WE MAKE ID EASY
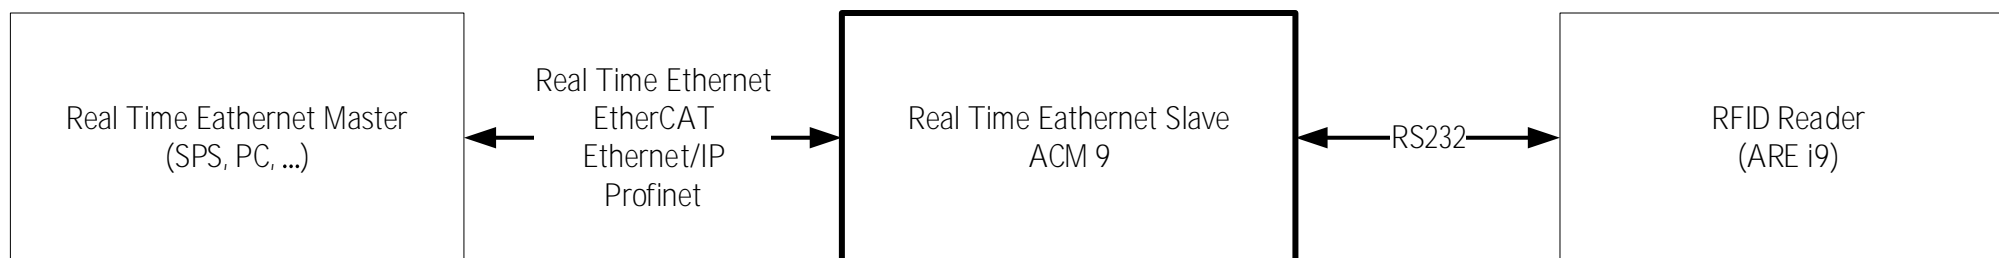

Operationa Description of the Communication Modules
ACM 9 – EtherCAT   V7IACM9EC
ACM9   – Ethernet/IP   V7IACM9EI
ACM9   – Profinet   V7IACM9PN

| Real Time Eathernet Master (SPS, PC, …) | ← Real Time Ethernet EtherCAT Ethernet/IP Profinet → | Real Time Eathernet Slave ACM 9 | ← RS232 → | RFID Reader (ARE i9) |

The ACM 9 (AEG ID Communication Module) is working as an interface adpater an real time Ethernet (EtherCAT, Ethernet/IP and Profinet) and RS232.
It is communicating with up to 4 AEG ID RFID readers (ARE i9 LF, ARE i9 HF) and does transfer this communication to a real time Ethernet.
That way the real time Ethernet Master in the network has access on the RFID readers using the ACM9.
