XX PC 1

Large red control box with an open lid. The internal circuit board features a green LCD display, several push buttons, and a keypad. A small white label is attached to the board. Two black antennas are mounted on the right side of the board. A power supply unit is visible at the top of the board.

Small red control box with a closed lid. It has a small LCD display and several push buttons on its front panel. A black antenna is visible on the right side.

Two blue power supply units (PSUs) connected to a terminal block. The terminal block has several wires connected to it, including a white wire and a black wire. The PSUs are labeled with technical specifications.

Two sheets of paper are placed on the table. The top sheet is a technical drawing or schematic, and the bottom sheet is a document with text and a red circular logo. The logo contains the word "LABORATORY".
