Israel

Dear Sirs/Ma'ams:

1. Herby we declare that part 25 2.4G WiMax is limited to Globalstar and Open Range related application, however, part 27 2.5G is for general WiMax application. Part 25 2.4G WiMax will be disabled for the end user through software if product is not selling to the Globalstar and Open Range related application.
2. This is a submission for Type Approval for a fixed ATC device that is to provide wireless internet access in the frequency band 2483.5 – 2495 MHz which was formerly dedicated to the Globalstar satellite phone service.
3. The device is based on the Beceem WiMax chipsets which are used for wireless internet access in the “WiMax” frequency bands, typically between 2.3 GHz to 2.7 GHz.
4. The device follows the related part 25 Open Range TDD-WiMAX ATC devices_rules defined in FCC-08-254 adopted on Oct-31st -2008 and the rules defined in the OET 273109 D01 Equip Auth Guide Part 25 TXReceiver v02 published on July-13th – 2009

Sincerely,
Avner Ruta
Certification manager
