EIRP Test report statement for FCCID:V8YFW181RG38002W

The test reports "SC\_TR09\_B.pdf" and "RFI-RPT-RP78529JD01A V2.0.pdf" contain EIRP calculation based on an external antenna with gain of 6dBi.

The antenna specification "Ant\_120300000039W\_19-AN3700-1901RS.Spec.09.09.10.pdf" states that the antenna gain is 5dBi nominal with permitted variation of  $\pm 0.7$ dB.

The stated value of antenna gain in the test report of 6dBi is the maximum possible antenna gain value of 5.7 dBi rounded up to the nearest whole dB.

Yours Sincerely

Charlie Blackham  
Director
