RE: FCC ID: V95-VTP & IC: 7591A-VTP

This radio contains the STM32W radio chip that has been discontinued by the manufacturer STMicroelectronics; as such, we have been required to find a replacement. The replacement we have found is the EM357 radio chip from Silicon Labs. This new chip is pin for pin compatible and the same basic function as the old chip.

Sincerely,

Emmanuel Stathopoulos
Certification Engineer
