

Operation Description for My First Driving School

The My First Driving School is powered by 3 x 1.5V size batteries. The radio control channel is 27.145MHz. There are two buttons in the front of transmitter.

When it switched on pressed once, the encoder U1 will generate a control signal to receiver. The crystal X1 and transistor Q2 is responsible to generate a radio frequency 27.145MHz and combined with control signal to transistor Q1.

The voice IC U2 will play the sound when the button was pressed.
