Equipment: Flexi 3-sector RF-module 1.7/2.1GHz for Flexi Multiradio Base Station
FCC ID: VBNFRIE-01
Subject: FCC Rule Parts 27 Class II Permissive Change

Dear Sir/Madam,

Nokia Siemens Networks applies class II Permissive Change for the enlarged functionality with E-UTRA LTE 20MHz band width and UTRA WCDMA of the FRIE RF-module.

No changes have been made to module hardware or original documentation. The told update is fully made by software modification.

The extensive testing performed shows that even with the above mentioned software modification the compliance with the requirement of FCC part 27 is still fulfilled.

The original Request for Confidentiality of FRIE under CFR 0.457 and 0.459, dated 15.11.2009 and signed by Keijo Katisko (Head of MR BTS HW Development), is valid for the Permissive Change under consideration.

Very Best Regards,

A handwritten signature in black ink, appearing to read 'Jari Virta', with a long horizontal stroke extending to the right.

Jari Virta,
R&D Manager,
WCDMA BTS Product Conformity
