Equipment: RF-module for Flexi WiMAX BTS 2.5
FCC ID: VBNFYRF-01
Subject: FCC Rule Parts 27 Class II Permissive Change

Dear Sir/Madam,

Nokia Siemens Networks/COO Radio Access applies class II Permissive Change for the SW-controlled MIMO (Multiple Input Multiple Output) of FYRF RF-module with the provision of upgraded radio capacity for the product.

No changes have been made to module hardware or original documentation. The told update is fully made by software modification.

The extensive testing performed shows that even with the above mentioned software modification the compliance with the requirement of FCC part 27 is still fulfilled.

Very Best Regards,

A handwritten signature in black ink, appearing to read 'Jari Virta', with a long horizontal flourish extending to the right.

Jari Virta,
