

Letter for Model Differences

Date: August 10, 2018

Model Differences

Model: ALVBP, ALV2P
FCC ID: VBU-ALVBP2P
IC: 21683-ALVBP2P

The model ALV2P supports Mifare card only. The model ALVBP supports both Mifare card and BLE feature. ALV2P is depopulated of the certified BLE module and of its relevant components from the model ALVBP. Both 13.56MHz transmitters are electrically identical among above-mentioned models.

The model ALV2P has one extra wired interface port (CN5). This port is not intended to be used by end users.

Other than the above mentioned BLE feature and the wired interface port, two models are electrically identical.

For further details of the model differences, refer to the submitted exhibits such as Operational Description, Block Diagram, BOM and Internal Photos.

Sincerely,

By: Keiji Iwata
