RE: Certification Application 50c and 55c

To Whom It May Concern:

The main differences between the 50c and 55c are as follows.

PCBA EDK281 – Same

Module Assembly – The 55c LCM is a 240 x 96 pixel size and the 50c LCM is a 224 x 90 pixel size

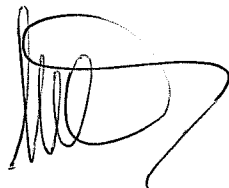

They both use the same ASIC on the LCM.

Final Assembly – The only difference is the Front and rear plastic which accommodates the different size LCM. The battery assembly is the same.

Circuit Diagram and Gerber's are the same

Thank you for your attention to this matter.

Yours faithfully

Francis Kent
