

ID LABEL AND LOCATION

Two proposed FCC ID label formats

The first one is for the outside of the device and is also described in the OEM manual.

This device complies with Part 15 of FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

The second one is affixed to RF module itself.

FCC ID: VCB-540d144
IC ID: 7143A-540d144

If the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label electronically or permanently referring to the enclosed module. This exterior label can use wording such as the following: “Contains Transmitter Module FCC ID: VCB-540d144” or “Contains FCC ID: VCB-540d144.” Any similar wording that expresses the same meaning may be used.
