RE: Infinite Peripherals, Inc.

FCC ID: VCC-LINEA

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please help with my confusion. I note that there is both a USB and a Bluetooth version of the LINEA. Is it possible to have a device with both USB and Bluetooth interfaces? If so, then the Rules for Part 15B (Certification or DofC) may need to apply in addition to 15.247. This could also affect labeling and manuals
- 2.) I note the Block Diagram refers to a Bluetooth part. But I do not see any Schematics related to this transmitter – only a connector is referenced where this device is expected to attach. Please review both your Schematics and Block Diagram and make appropriate changes.
- 3.) FYI: If at some point in the future, your client wants to include Certification for Canada, you may have difficulty with the labeling. Please refer to RSS-GEN for the latest information on labels.

William H. Graff

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
