Subject: Versions of Opel CIM

Both code numbers 204.287 and 204.302 of the Opel CIM have only differences regarding the function groups of the steering wheel angle sensor. The code number 204.287 has the complete functional range and derived from this the code number 204.302 is a variant with a lower functional range.

The function "Immobilizer" is identically in both versions.

Best regards

i.A. Thomas Drescher
