Re: FCC ID: VEYCN1300W1

To Whom It May Concern:

The following application is submitted on behalf of our client, xG Technology, Inc., for evaluation of their 802.11 b/g/n module CN1300W1 for a Class II Permissive Change under FCC Part 15.247.

The purpose of the Class II Permissive Change is to add a new antenna configuration and reduce the RF output power as documented in the supporting documents for integration within the xG Technology model CN1300 host device. The Class II permissive change applies for the 2.4 GHz band only. The 5 GHz mode of operation is not supported for this configuration. The module was evaluated for radiated, RF conducted and power line conducted emissions for the new host/antenna configuration.

The FCC ID: VEYCN1300W1 was tested as described above to the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
