

## WPC-2 BLOCK DIAGRAM

INPUT  
VOLTAGE

## BASIC FUNCTION

The WPC-2 industrial controller operates on either 120Vac or 240Vac. It may also come equipped with a circuit breaker panel for added protection of incoming power. It may contain one or two timers that control pool equipment such as a pool/spa pumps and has two remote capable circuits for the control of lighting fixtures such as Sam and Sal underwater lighting fixtures. The remote is also able to synchronize the two circuits.
