

Report No.: RWAZ202300099A

3.7 Radio frequency exposure

Test Date:	2024-01-02	Test By:	Lirou Li
Environment condition:	Temperature: 22.9°C; Relative Humidity:54%; A		essure: 101.5kPa

Radiation leakage was measured in the as-received condition with the oven door closed using a microwave leakage meter.

A 275mL water load was placed in the center of the oven and the oven was operated at maximum output power.

There was no microwave leakage exceeding a power level of <u>0.14</u>mW/cm2 observed at any point 5 cm or more from the external surface of the oven.

A maximum of 1.0mW/cm2 is allowed in accordance with the applicable Federal Standards. Hence, microwave leakage in the as-received condition with the oven door closed was below the maximum allowed.
