

## 3.7 Radio frequency exposure

Test Date:	2024-01-29	Test By:	Lirou Li
Environment condition:	Temperature: 20.9°C; Relative Humidity:47%; ATM Pressure: 101.2k		essure: 101.2kPa

Radiation leakage was measured in the as-received condition with the oven door closed using a microwave leakage meter.

A 275mL water load was placed in the center of the oven and the oven was operated at maximum output power.

There was no microwave leakage exceeding a power level of  $\underline{\mathbf{0.1}}$ mW/cm<sup>2</sup> observed at any point 5 cm or more from the external surface of the oven.

A maximum of 1.0mW/cm<sup>2</sup> is allowed in accordance with the applicable Federal Standards. Hence, microwave leakage in the as-received condition with the oven door closed was below the maximum allowed.
