Attachments: LABEL.pdf; test report.pdf

Dear mike kuo,

I send revised files now.

Q#3: Both user manual and operating description mentioned that this barcode scanner can connect to cell phone and PDA. How does it connect, via cable or wireless? **It is not wireless or Via cable only.**

Q#4: Please confirm if the scanning mode had been verified during the test first.

According to the test setup photos, EUT was connected to a laptop via a USB cable to upload scanned data to laptop. So, please also confirm if the mode of connecting to laptop directly via the attached swing-out USB had been verified during the test.

Reply:we tested continuous scanning mode and upload mode under PC connecting.we used to special supported software from applicant.

In addition, all peripherals of the support equipment should be connected during the test. However, except the EUT, only the printer was connected. Please re-do the test with the full systems on.

Reply: I see, I will upload as soon as possible.

Q#5: Per FCC Part 2, FCC ID shall clearly indicate on the test report, so please add the FCC ID onto the test report.

Q#6: Please confirm if block diagram and circuit diagram will like to be kept as confidential after granted.

Reply:we want to keep as confidential after granted and I sent confidential letter at your e-mail.

Q#7: Four frequencies' test result of conducted emission test data were in blank, please have a check and fill them in.

Reply:I see

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best Regards

Mike Kuo
