Hi Seven

Q#1: The RF exposure information stated on page 17 mentioned: the device was tested for typical lap held operations with the device contacted directly to the human body to the back side of the notebook computer" which doesn't agree with the design of device. Please correct.

Ans: The user manual had been revised, please see page 17.

GT-750F User Manual Revised 0806.pdf

Q#2: Please demonstrate that this Bluetooth device has complied with FCC 15.247 requirement as below:

Is the hopping sequence pseudorandom, based on the technical description?
Is each channel used equally on average, based on the technical description?

Does the associated system receiver have a compliant input bandwidth, based on the measured 20 dB emission bandwidth?

Does the associated system receiver have the ability to hop in synchronization with the transmitter, based on the technical description?
15.247(g) Does the design of the frequency hopping system allow it to comply with all pertinent requirements when presented with a lengthy data stream?

15.247(h) Does the frequency hopping system comply with the non-coordination requirement?

Ans: Please have the Bluetooth DoC.

GT-750F Bluetooth DoC.pdf

Best Regards,

Mike

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
