

# CANZH<sub>2</sub>O

## WIRELESS SPEAKERS

### Welcome to Canz H2O!

These speakers offer two setup options:

**Stereo setup** for using both speakers together

**Single-Speaker setup** for using each speaker separately

This guide takes you through the steps for either setup option.

Instructions en français.....	11
Instrucciones en español.....	21

# Welcome to Canz H2O!

---

The best little speakers to go anywhere: waterproof up to 3ft, and tested to withstand full submersion for up to 30 minutes! They even float if they fall in the water! Of course, we don't recommend leaving the Canz H2O in or under water for extended periods of time—but a little bit won't do any harm! Just make sure the back flap covering the USB jack is sealed.

## Unpack

---

Make sure the following items came in this package:

- (2) H2O speakers
- (2) USB charging cables

# Charge the speakers

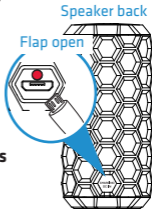

---

Before you start using these speakers for the first time, it's a good idea to charge them completely.

**To charge each speaker:** Open the CHARGING DC IN flap on the back of the speaker. Plug one of the included USB cables into the jack behind this flap.

Plug the other end of the USB charging cable into a power source, like a computer or a USB charging adapter.

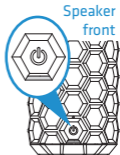

**IMPORTANT:** Make sure this flap is closed if the speaker is going to get wet.

# Stereo Setup (both speakers together)

## 1. Turn both speakers on

Press and hold the  button on front of each speaker to turn it on. The power up tone sounds and the  button starts blinking white on each speaker.

Wait for the speakers to announce “Left connected” and “Right connected.”

The  button on the right speaker turns solid white (it keeps blinking on the left speaker).

Left speaker

Blinking white

Right speaker

Solid white

This means the two speakers are linked for stereo and ready to pair with your Bluetooth device.

## 2. Pair and connect to your phone

Enable Bluetooth on your smartphone or other device (if it isn't already on).

Make sure the  button on the front of the left speaker is blinking rapidly. (If it isn't, give a short double-press on the  button. The speaker gives an audio signal.)

Choose **CANZ H2O ST** from the pairing options on your smartphone. (If it's not in the list, choose "Scan" from your phone's Bluetooth menu.)

## Stereo Setup (continued)

---

The speaker gives an audio signal when it's finished pairing and connecting to your smartphone. The  button turns solid white.

**Note:** The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

### 3. Play music

Set your device's volume for music to 75%. Start playing music or other audio on your device. Within seconds, the speaker starts streaming the audio wirelessly via Bluetooth.

**To adjust the volume of your audio:** Use the volume controls on your phone.

**To play/pause:** If you're playing music via Bluetooth, press once on the speaker's  button.

If you've previously paired your phone or other Bluetooth device with this speaker, the speaker will automatically attempt to reconnect to that device when you switch the speaker on. If you want to pair to a new device, give a short double-press to the  button. The speaker gives a signal and the  button starts blinking.

## Bluetooth Wireless Connection Tips

- Make sure the Bluetooth capability of your device is turned on.
- The Bluetooth wireless connection works up to a range of roughly 33 feet (10 meters). This range may vary, however, based on other factors, such as room layout, wall material, obstacles, your device's Bluetooth performance, etc. If you're having problems connecting to this speaker, move closer to it.
- If your device asks you for a password to connect, use "0000".

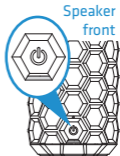

# Single Setup (each speaker separately)

---

## 1. Turn one speaker on

Press and hold the  button on front of one speaker to turn it on. **Don't turn the other speaker on yet!**

The power up tone sounds and the  button starts blinking white on this speaker, then starts blinking blue.

## 2. Pair and connect to your phone.

Enable Bluetooth on your smartphone or other device (if it isn't already on).

Make sure the  button on the front of the speaker is blinking blue rapidly. (If it isn't, give a short double-press on the  button. The speaker gives an audio signal.)

Choose **CANZ H2O ST** from the pairing options on your smartphone. (If it's not in the list, choose "Scan" from your phone's Bluetooth menu.)

The speaker gives an audio signal when it's finished pairing and connecting to your smartphone. The  button turns solid blue.

## Single Setup (continued)

---

**Note:** The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

See the Bluetooth Wireless Connection Tips section on page xx for info and troubleshooting.

### 3. Play music

Set your device's volume for music to 75%. Start playing music or other audio on your device. Within seconds, the speaker starts streaming the audio wirelessly via Bluetooth.

**To adjust the volume of your audio:** Use the volume controls on your phone.

**To play/pause:** If you're playing music via Bluetooth, press once on the speaker's  button.

## Mounting the Canz H2O

The Canz H2O has a standard 1/4"-20 mount on its side, compatible with any accessory offering this connection (like some tripods and bike mounts).

# Tour of the speaker

---

## Front

⏻ button turns the speaker on/off (press and hold), puts the speaker into pairing mode (double press), and plays/pauses playback when audio is playing via Bluetooth. It also shows the Bluetooth status of the speaker:

***If you're using the Single-Speaker Setup:***

Solid blue means the speaker is connected via Bluetooth.

Fast blinking blue means the speaker is ready to pair via Bluetooth.

Slow blinking blue means the speaker is reconnecting via Bluetooth.

***If you're using the Stereo Setup (2 Speakers):***

Solid white means the right speaker is linked for stereo sound.

Slow blinking white means the two speakers are trying to link for stereo sound.

Fast blinking white (left speaker only) means this speaker is ready to pair via Bluetooth.

## Back (behind the flap)

**Charging** jack connects to the provided USB charging cable to plug the speaker into a power source or adapter.

**Charging indicator** shows the charging status of the speaker:

- solid red while charging
- solid green when charged
