MP3+Bluetooth Headset

My Ear

● *Important Notice:*

When both built-in MP3 player and bluetooth are on
The headset will play the music by built-in MP3 player and bluetooth connection will be in standby mode. If there is a phone call, the built-in MP3 player will be paused and you will hear a call signal. You can press the [BT] button to receive or reject the call. After you finish the phone call, the headset will switch back to the built-in MP3 player and resume the music.

When built-in MP3 player is off and bluetooth is on
The headset will be in standby mode. If you play music in your mobile phone and send music signal to the headset, you will be able to hear the music from the headset through A2DP profile. If there is a phone call, you can press the [BT] button to receive or reject the call. After you finish the phone call, the mobile will resume the music. You can also receive call even you are not playing music in your mobile.

Please note that it is not recommended to switch on the built-in MP3 player when you are listening to your mobile playing music through A2DP profile. The priority of audio channels are always given to BT connection.
