2. Operational Instructions

2.1 Copying MP3 files from computer to MP3 Player

·Connect the player to the USB port of your computer using the USB cable.

·A " " icon appears at the right bottom of the Tool Bar. A "Removable Disk " icon also appears in "My Computer"

·Use the File manager function to copy files to the player.

·Then double click the " " icon at the right bottom of the Tool Bar to disable the   "removable disk ". When the "This Disk Has Been Disabled Successfully" dialog box appears, disconnect the player from the USB port.

2.2 Recharging the Battery

There are two ways to recharge the battery:

·To recharge the battery via USB port of your computer, simply connect the player using the USB cable to your computer to recharge the battery.

·To recharge the battery using the USB charger (optional), simply connect the player to the charger using the USB cable, then connect the charger to the power supply.

   *Note: When disconnected from the USB port after recharging of files uploading, the player will switch off automatically.

2.3 Operating in Water (Swimming Mode)

·When operating the player in water, you must use the waterproof earphones and plug it into the earphone jack.

·Hang the MP3 player onto the swimming goggles and place the MP3 player behind your head.

·Press and hold the " " for 5~6 seconds to switch on the player (The LCD display goes on) and select your desire features.

·Remove all water drops on the player surface after use.

·You must plug the waterproof earphones into your ear canal and fix the cable well before going into water, when you go swimming. Please refer to appendix.

WARNING: Swimming without plugging the waterproof earphones into the ear canal will damage the waterproof earphones

3. Operating Environments

The player can work properly in the following environments:

·Swimming/Hot spring/Sauna/Spa/surfing/Windsurfing and other water activities.

·Normal environment

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2. changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

3. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

4. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different
- from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
