

Technical Compliance Showing

Global Traffic Technologies LLC (“Global”) is seeking FCC authorization to market, under its own certification, the transmitter previously certified by the FCC to 3M Company (“3M”) under FCC ID DGF-OPTICOMGPS1. The equipment for which Global seeks certification will be electrically identical to the equipment in the certification granted to 3M. The only change that Global proposes to make is in the product labeling. Accordingly, Global incorporates by reference the technical details of the equipment as submitted by 3M in connection with its application for equipment certification.
