

Reason for Change of ID

3M Company (“3M”) has sold its Intelligent Transportation Systems business to a new company, namely, Global TrafficTechnologies, LLC (“Global”). Global proposes to market under its own name the transmitter previously certified by the FCC to 3M under FCC ID DGF-OPTICOMGPS1. The equipment for which Global seeks FCC authorization under its own identifier will be electrical identical to the equipment certified for 3M. The only change that Global proposes is to substitute its own label on the device.

Global was recently issued grantee code VJB by the Commission. Accordingly, Global seeks certification of the device under FCC ID VJB-OPTICOMGPS1.
