FCC ID: VK2-ESKYSZ08

Circuit Description

The <u>72.13</u>, <u>72.87</u>MHz crystal oscillator drives the base of <u>Q5</u> the final/buffer amplifier. The modulation provided by <u>IC</u>. The output of <u>Q5</u> has the matching network consisting of <u>C24</u>, <u>C25</u>, <u>C26</u> and <u>C27</u>, <u>T4</u>, <u>T5</u> that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a <u>96</u>cm long Metal antenna.

There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 12 Volt ("AA" size battery x 8) primary battery

Operation Descriptions

The transmitter is a <u>remote control toy</u> operating at <u>72.13MHz</u>, <u>72.87MHz</u> band. The transmitter is powered by a <u>12V</u> battery (<u>"AA" size battery x 8</u>) and the transmitting frequency is crystal controlled. The operation is achieved by different combinations of form pulse modulating signal on the <u>72.13MHz</u> & <u>72.87MHz</u> carrier frequency.

Remarks:

The transmitter is a <u>6</u> joystick transmitter. The EUT continues to transmit while joystick is being pressed. It is joystick transmitter, Modulation by IC; and type is Pulse modulation.
