To Whom It May Concern:

The Radical 7 model that is being submitted for consideration may also be called out as the Radical 7C+ or the Radical 7R in internal documentation. These are project/developmental names used in the design and development of the model but in all cases represent the Radical 7 model as is being submitted for approval.

Please note that in Northwest EMC Test Report #s MASI0009 and MASI0009.1, the Model name Rad 87 is used. The Rad 87 uses the exact same WiFi radio module as the subject device, the Model Radical 7R. The radios are electrically and mechanically identical. The antenna port direct connect data from the Rad 87 is representative of the Radical 7R.

Sincerely,

A handwritten signature in black ink, appearing to read "David Mosley".

David Mosley
