Inquiry on 09/09/2020 :

Inquiry:

A customer would like to place their ID label in their User Manual rather than on the product itself. Their justification is explained in the attached letter. Please review and confirm if this will be acceptable.

Thanks

FCC response on 09/09/2020

According to the FCC publication 784748, When the device is so small, or for such use that it is impracticable to label with a font size that is four-points or larger (and the device does not utilize electronic labeling), then the FCC ID shall be placed in the user manual, and the FCC ID shall also be placed either on the device packaging or on a removable label attached to the device. The device you have described has a surface area of about 1 square inch. 1 point = 0.013836 inch. 4 points = 0.055344 inch. A label with FCC ID: OH2BLEGST with spaces would give us 16 spaces. 0.885504 inch. It could be done but according to the publication you can place the FCC ID in the user manual and on the device packaging or a removable label. It is tight the FCC agrees.
