

The image shows the interior of a white plastic enclosure. On the left, a green printed circuit board (PCB) is mounted vertically. It contains various electronic components, including integrated circuits, capacitors, and resistors. A yellow antenna is attached to the PCB. To the right of the PCB, there is a small, rectangular display screen with a black frame. Below the screen, there are several red and black wires connected to a small electronic module. The enclosure has several mounting points and a small handle at the bottom.
