Your wireless earbuds and charge case

Note: Twist the case to open it. The case indicates which earbud is left and right. When returning your earbuds to the case, you can put your earbuds in either pocket. The case automatically resets the earbuds to left and right.

Earbuds automatically turn on when removed from the case. They turn off and charge when placed back in the case.

Step 1: Wear

Best fit & best sound

Try **all** the gels to find the best fit and the best sound. The fit is right when you get a complete seal, the gel feels comfortable, and you get the best quality and loudest sound.

Tip: More than one gel size may fit you. Choose the one that completely seals your ear canal for the best sound.

Note: You may need different size gels for left and right.

Wear

Insert the earbuds with the ear gel directed towards your ear canal. Twist gently until they fit comfortably and feel secure in your ear.

Note: When you take the earbuds out of the case, you have 5 minutes to put them on, or they go dormant. Put them in the case to wake them back up.

Step 2: Pair with Bluetooth

1

Turn on Bluetooth on your device.

2

Take **one** wireless earbud out of case, and put it in your ear (Either L or R).

3

On your device, go to the Bluetooth menu to pair & connect. You will hear "VerveOnes connected" when pairing is complete.

4

Put the first earbud back into the case. Take the other earbud out of the case and put it in your ear. Refresh your phone screen and repeat Step 3 to pair the second earbud.

5

Now put the first earbud back in your other ear. After a few seconds you will hear "Earbuds linked". You are now ready to play music via your device.

Tip: For each use, pull one earbud out of case and place in ear and wait for "VerveOnes connected" prompt. Now remove second earbud and place in other ear and wait for "Earbuds linked" prompt. If earbuds fail to link, replace in case to reset and remove again.

Note: The first earbud will be connected to your device, the second earbud will be linked to the other earbud.

Music

Start playing music on your music player and then control it with either earbud.

- Press once to pause a track. Press again to resume.
- Double-press to go to the next track (depending on your music player).
- Triple-press to go back one track (or start the song over).
- Press and hold for 6 seconds to hear the Equalizer options. Press again to select a preferred setting.

Note: Playing the next or previous track depends on your music player or app.

Tip: If you take out an earbud while you're playing music, the music will stop when Ear Detect is turned on.

Calls & Voice Commands

When making and answering calls or using voice commands, you can press either earbud.

- Press once to answer an incoming call, or double-press to reject it.
- Press once to end a call.
- When not in a call and not playing music, press and hold to start voice commands. You'll hear a tone. Release the button. You'll hear a second tone from your phone. Say your command. (Press and hold again to cancel a voice command.)

Note: For normal calls you will hear the call only in one earbud unless you are using VOP software for your calls.

Voice commands use your phone's voice control app and may not be available in all countries.

Tip: When Ear Detect is on, a call will automatically transfer to the phone when the earbud is removed from your ear.

When Ear Detect is off (default setting), a call will remain in the headset until transferred to the phone via phone keypad.

Charge

Charge the earbuds

Put the earbuds into the case and press them firmly until you hear a click and the earbud lights turn on. Twist the case until it's completely closed.

Tip: Earbuds are designed to be a snug fit in the case. You may need to push earbuds from the side to remove.

Charge the case

Charge the case and earbuds by plugging in the charging cable. The case light turns on when it's charging.

Charge level

Your earbuds let you know when your battery level is low. You'll hear a message when there is one hour, as well as 15 minutes of battery left.

Earbud status lights

Charging	Slow blinking white
Full charge	Steady white
Needs charging	Blinking red

Note: The earbud lights turn on briefly, then turn off to conserve battery. The earbuds will continue to charge until full.

Case status lights

When your case is plugged into a wall charger, you'll see charging lights.

Charging	Slow blinking white
Full charge	Steady white
Needs charging	Blinking red

Note: Your battery is designed to last the life of the product. It should only be removed by a recycling facility. Any attempt to remove or replace your battery will damage the product and void your warranty.

Hubble Connect™ for VerveLife™

Hubble Connect for VerveLife can greatly enhance your earbud experience. Download app for free at the App Store® or Google Play™ (Android™ 4.3 or higher)

- **Locate a lost earbud:** Locate on a map the last time your earbud was connected to your device.
- **Adjust the equalizer:** Choose from six preset sound profiles, so your tunes sound the way you like.
- **Pass-Through Audio (default off):** Stay in tune with your surroundings by turning Pass-Through on to hear noises around you.
- **Ear Detect (default off):** When Ear Detect is on, the earbud automatically turns on when it detects it is in your ear and turns off when removed from your ear.

When Ear Detect is off, earbuds will remain on when connected to your device until you put them in the case.

- **Voice Prompts:** Choose a new language for Voice Prompts from the available selection. This update will take several minutes. The earbuds must be inserted into the case and be close to your device during update. Best to do while charging the phone and headset.
- **Help:** Get answers.

Note: Both earbuds must be in the case to make changes to these settings via the app (Does not apply for the location or help feature).

Settings

Press and hold the earbud for 6 seconds to access settings (while not playing music and not in a call).

To exit settings, just listen until your earbuds finish cycling through them.

Tip: You can access all of these options with "Hubble Connect for VerveLife" on page 8.

Ear Detect

Automatically detect when you put the earbuds into your ears and power on.

Voice Answer

Answer your phone using your voice.

Pass-Through Audio

Hear what's going on around you while wearing your earbuds.

Restore Factory Settings

Reset your earbuds to their factory settings.

Use this product responsibly

VerveOnes are designed to give the user great sounding wireless earbuds. However the product should be used responsibly.

Safety instructions for use

To avoid hearing damage, keep the volume at a moderate level. Avoid listening to music at loud volume levels for prolonged periods of time as this may cause permanent hearing damage or hearing loss.

Your hearing is delicate and highly sensitive so please listen to your music responsibly. For more information visit the Deafness Research Foundation www.drf.org

Don't use VerveOnes when it is unsafe to do so. For example, while operating a vehicle, cycling, crossing a road, or any activity which requires your attention and ability to hear. You should be aware of your surroundings and use VerveOnes responsibly.
