

November 14, 2008

Northwest EMC
22975 NW Evergreen Parkway Suite 400
Hillsboro, OR 97124

Gentlemen:

This letter is to define the differences between the H1B0 media player (authorized under FCC ID:VLPM10FAM) and the HS1C0 media player which is to be authorized under a Class II permissive change. The differences between the two products are as follows:

1. *Housing has been changed from a cast metal front with plastic back, to an all-plastic housing.*
2. *FM receiver function has been removed.*
3. *LCD display has been replaced with another of equivalent functionality*
4. *Data bus terminators have been added to reduce unintentional-radiation, eliminating the need for foil shielding inside the device. Specifically, foil shielding covering the audio jack as well as foil shielding covering the flex-connection to the LCD have been removed.*

Sincerely,

A handwritten signature in black ink, appearing to read "Stewart Katz", is written over a horizontal line.

Stewart Katz
Vice President and General Manager
Portable Media and Electronics
