## In reference to FCC ID VNCMEDI LAS

### Justification for Part 15 Unlicensed Modular Transmitter Approval according to Section 15.212

#### 1. Own RF Shielding

Not complied, but subject to limited modular approval.

The Grantee can demonstrate that it will retain control over the final installation of the device, such that compliance of the end product is assured. In such a case, an operating condition on the grant of equipment authorization for the module would state that the module is only approved for use when installed in devices produced by a specific manufacturer, typically the Grantee.

#### 2. Buffered Modulation inputs

Complied, no direct modulation input. Modulated signals will be buffered by micro controller IC7 and reader chip IC2

#### 3. Own power supply regulation

Not complied, but subject to limited modular approval.

The Grantee can demonstrate that it will retain control over the final installation of the device, such that compliance of the end product is assured. For details see installation guide.

#### 4. Antenna requirements

Complied, antenna permanently attached

#### 5. Test in stand-alone configuration

Complied, see test report for details. Cable lengths typical to actual use.

#### 6. Own FCC ID

Complied, the exterior label will be "**Contains FCC ID VNCMEDI LAS**"

Subject to limited modular approval

#### 7. The Modular Transmitter must comply with any specific rule and the manufacturer must provide adequate instructions

The EUT is compliant with all applicable FCC rules. Detail instructions are given in the installation guide.

#### 8. RF Exposure requirements

Not applicable since the unit operates under section 15.209 of the FCC rules. The reference guide contains general installation and operation instructions. MPE evaluation not required
