RE: ATCB005475

FCC ID: VOEZWL0115

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. It is required to provide a MPE report showing that the power density of this portable device operates at a distance of 2.5cm does not exceed  $1\text{mW}/\text{cm}^2$  limit.
2. Please put information to user into user manual according to part 15.21 as follows:  
"Section 15.21 Information to user.  
The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that **changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.**"
3. FCC Logo can be only shown on the label as this device has been tested under Part 15B.  
"FYI – This is for your information only and does not require a response to ATCB. Please note that a DoC can only be applied to certain types of equipment as specified in 15.101 of the FCC rules. Please note that a DoC report may only be done by a properly accredited test lab in a country that has a current and active MRA with the US. Please note that the applicability of the DoC and its proper use on an FCC label is the responsibility of the grantee. ATCB recommends that the applicant address all associated DoC labeling issues and that such DoC labeling be strictly in accordance with the following: 47CFR 2.906, 2.803, 2.901, 2.906, 2.909, 2.948, 2.1071 through 2.1077, 15.19, 15.25, 15.31, 15.37, 15.101, 15.102 and any other DoC requirements not specified above
