of Transportation

Federal Aviation  
Administration

JAN 29 2008

Mr. Andy Leimer  
Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

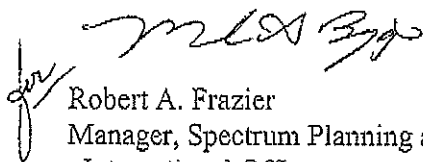

Dear Mr. Leimer:

We have received the EDMO Distributors, Inc. letter for the Federal Communications Commission (FCC) application for certification of transceiver, Model CSR, Inc. FL-760, with FCC ID VOSFL760A dated January 4, 2008, and completed the subject review. We have no objection to the FCC certification of this very high frequency (VHF) EDMO transceiver, which operates in the aviation-protected band 118.0 MHz to 136.975 MHz within the United States national airspace system.

EDMO Distributors, Inc., as all applicants for FCC certification, for avionics transceivers should be aware that it is likely that aircraft will employ Global Navigation Satellite System (GNSS) receivers along with VHF transceivers. It is also likely that without proper filtering, of the VHF transceiver harmonic emissions (as per TSO-C169), there is a potential for interference to be caused by the VHF transceiver to the GNSS receiver.

If you require any additional information, please contact Ms. Annette Allender, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

Robert A. Frazier  
Manager, Spectrum Planning and  
International Office
