## Subject : Modular Approval Declaration Letter

VPYLB1LD is seeking FCC equipment authorization as		
gle Modular Transmitter		
gle Limited Modular Transmitter		
Equipment Under Testing ('EUT') satisfy the requirement for		
gle Modular Approval		
☐ Single Limited Modular Approval as detailed in FCC Public Notice DA00-1407.		
FCC Requirement of Modular Approval		
he modular transmitter must have its own RF shielding.	⊠YES	□NO
he modular transmitter must have buffered modulation/data inputs.	⊠YES	□NO
he modular transmitter must have its own power supply regulation.	⊠YES	□NO
he modular transmitter must comply with the antenna requirements of ection 15.203 and 15.204(c).	⊠YES	□NO
he modular transmitter must be tested in a stand-alone configuration.	⊠YES	□NO
he modular transmitter must be labeled with its own FCC ID number.	⊠YES	□NO
the modular transmitter must comply with any specific rule or operating equirements applicable to the transmitter and the manufacture must rovide adequate instruction along with the module to explain any such equirements.	⊠YES	□NO
he modular transmitter must comply with any applicable RF exposure equirements.	⊠YES	□NO
Note:  Limited modular approval may be granted if EUT does not meet all of the requirement shown above  Limited modular approval may be granted in case that the applicant can demonstrate to retain control over the final installation of the device such that compliance of the end product is assured. In that case, an operating condition on the limited modular approval for the module shall state that the module is only designated for the end product manufactured by a specific manufacturer  When limited modular approval is sought, the application for equipment certification shall state how control of the end product into which the module will be installed and maintained such that full compliance of the end product is always ensured.  It shall be provided that clear and specific instructions describing the conditions limitations and procedures for third-parties to use and/or integrate the module into a host device  For non-Software Defined Radio transmitter modules where software is used to ensure compliance of the device, it shall be provided that the technical description of how such control is implemented to ensure to prevent the third party from modifying (see KDB 594280).  Compliance of a module in its final configuration is the responsibility of the applicant. A host device will not be considered certified if the instructions regarding antenna configuration provided in the original description, of one or more separately certified modules it contains, were not followed.  Example: A separately certified low-power transceiver module using Bluetooth technology which is housed in a desktop computer, laptop or peripheral does not require the overall system to be recertified, if the desktop computer, laptop or peripheral as a stand-alone unit complies with all applicable technical standards.		
	gle Modular Transmitter gle Limited Modular Transmitter  Int Under Testing ('EUT') satisfy the requirement for gle Modular Approval gle Limited Modular Approval ailed in FCC Public Notice DA00-1407.  Requirement of Modular Approval the modular transmitter must have its own RF shielding. The modular transmitter must have buffered modulation/data inputs. The modular transmitter must have its own power supply regulation. The modular transmitter must comply with the antenna requirements of action 15.203 and 15.204(c). The modular transmitter must be tested in a stand-alone configuration. The modular transmitter must be labeled with its own FCC ID number. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacture must rovide adequate instruction along with the module to explain any such requirements. The modular transmitter must comply with any applicable RF exposure requirements. The modular approval may be granted if EUT does not meet all of the requirement shown above ited modular approval may be granted in case that the applicant can demonstrate to retain contributed modular approval may be granted in case that the applicant can demonstrate to retain contributed modular approval is sought, the application for equipment certification shall state how the dured modular approval is sought, the application for equipment certification shall state how the dured modular approval is sought, the application for equipment certification shall state how the dured modular approval is sought, the application for equipment certification shall state how the dured modular approval is sought, the application for equipment certification shall state how the dured module will be installed and maintained such that full compliance of the end produced that the technical description of how such control is implemented to ensure to prevent inlighing (see KDB 594280).  The provided that the technical description of how such control is implemented to ensure to preven	gle Modular Transmitter gle Limited Modular Transmitter  Int Under Testing ('EUT') satisfy the requirement for gle Modular Approval gle Limited Modular Approval gle Limited Modular Approval gle Limited Modular Approval gle Limited Modular Approval he modular transmitter must have its own RF shielding.  Interpretation of Modular Approval he modular transmitter must have buffered modulation/data inputs.  Interpretation of Modular Approval he modular transmitter must have its own power supply regulation.  Interpretation of Modular Approval he modular transmitter must have its own power supply regulation.  Interpretation of Modular Approval he modular transmitter must comply with the antenna requirements of section 15.203 and 15.204(c).  Interpretation of Modular Approval interpretation of the modular transmitter must be labeled with its own FCC ID number.  Interpretation of Modular Approval interpretation of the modular transmitter must comply with any specific rule or operating applicable to the transmitter and the manufacture must revoide adequate instruction along with the module to explain any such applicable approval for the modular approval for the modular approval for the modular specific must be applicant can demonstrate to retain control over the final allation of the device such that compliance of the end product is assured. In that case, an operating condition at modular approval for the module shall state that the module is only designated for the end product manual specific manufacturer  In limited modular approval is sought, the application for equipment certification shall state how control of the duction which the module will be installed and maintained such that full compliance of the end product is an all be provided that clear and specific instructions describing the conditions limitations and procedures for the sea and/or integrate the module into a host device  Interpretation of the module into a host device in application of the opicion of the device will not be confided if the instructions r
