To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: VPYLB1MW, originally granted on 10/04/2017 and all its permissive changes.

We have obtained Limited Modular Approval in Mobile configuration for this module. This time, it is used in the portable host devices (Digital Camera, N1932), therefore SAR testing with the host device was performed, and the Class II permissive change application in Portable configuration is submitted.

When this module is installed, the following points are changed by the software of the host device.

- Output powers of WLAN 2.4GHz and 5GHz are partially reduced and it is tuned to operate at a lower power setting than the original output power.
- The frequency bands 5600-5640MHz(11a,11n-20,11ac-20), 5590-5630MHz(11n-40,11ac-40), 5610MHz(11ac-80), 5720MHz(11a,11n-20,11ac-20), 5710MHz(11n-40,11ac-40) and 5690MHz(11ac-80) are disabled.

For details of this modification, please refer to the following documents.
There is no change before and after change except for these documents.
