RE: Attestation of Indoor Access Point Operation (6ID)

FCC ID: VPYLBEE5XV2EA

ISED certification number: 772C-LBEE5XV2EA

Dear Examiner,

We, (Murata Manufacturing Co., Ltd.) , attest that this client device complies with the following requirements of the FCC's and ISED's rules for the 6GHz bands:

1. Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent.
2. An 11ax IEEE AP's Transmit Power Envelope element has information fields for power limits for connecting client/subordinate devices. The TPE information is embedded in this device's signals and used to tell the connecting clients/subordinate that the max TX powers it is allowed to transmit. There is a regulatory info field in this device's beacon and probe response frames which details this device type when the client/subordinate associates to this device.
3. Access point operating in the 5.925-7.125 GHz band shall be supplied power from a wired connection, has an integrated antenna, is not battery powered, and does not have a weatherized enclosure.
4. We acknowledge this device is subject to and in full compliance with the device restrictions listed below. All users are notified of these restrictions through the user manual.
 - This device's operation will not be allowed on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.
 - Indoor access points are prohibited for control of or communications with unmanned aircraft systems, including drones.
