FCC ID : VPYLBVX532
 Model : TypeVX
 Applicant : Murata Manufacturing Co., Ltd.

Request for Limited Modular Transmitter Approval

This WLAN Module (Model: TypeVX) is designed by Murata Manufacturing Co., Ltd..
 This modular transmitter complies with the modular transmitters basic requirements (Item 1 to 8) in FCC Part 15 Subpart C Section 15.212 as indicated below:

Modular Approval Checklist:

Modular approval requirement	Yes	No
(1) Have its own RF shielding.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(2) Have buffered modulation/data inputs.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(3) Have its own power supply regulation.	<input type="checkbox"/>	<input checked="" type="checkbox"/> This modular transmitter has own power supply regulator and VBAT 3.4V from end product is stabilized by this regulator. However PAVDD 2.85V is not through this regulator, stabilized and provided constantly from end product. Please refer to the block diagram.
(4) Comply with the antenna and transmission system requirements of § 15.203, 15.204(b) and 15.204(c).	<input checked="" type="checkbox"/>	<input type="checkbox"/> Antenna is permanently attached to the modular transmitter because they are Pattern Antenna and FPC Antenna. These antennas will be designed based on KDB996369, this modular transmitter always be used in the configuration in which it was authorized.
(5) Tested in a stand-alone configuration. Unless the transmitter module will be battery powered, it must comply with the AC line conducted requirements found in FCC § 15.207. AC or DC power lines and data input/output lines connected to the module must not contain ferrites, unless they will be marketed with the module. The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available.	<input type="checkbox"/>	<input checked="" type="checkbox"/> The modular transmitter has been performed the testing in a state of being installed on a test jig board simulating the board of the installed end product, therefore has not been performed the testing as a stand alone and then confirmed the compliance. The module and antenna will be mounted on a board similar to the one shown in the test set photo, and the board will be installed in the end product.

Murata
Manufacturing Co., Ltd.

<p>(6) Equipped with either a permanently affixed label or must be capable of electronically displaying its FCC ID. If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>(7) Comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>(8) Comply with any applicable RF exposure requirements in its final configuration: The modular transmitter complies with FCC radiation exposure requirement.</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/> Body SAR<0.4W/kg Please refer to SAR Test Report. This module will be installed the limited product that meets this SAR value.
