[Model: Type XN]

This module and antenna are concrete design, and approved according to KDB996369. The connection to the antenna is made through a host's printed board micro-strip trace layout to an trace antenna on a printed circuit board. The module has been performed the testing in a state of being installed on a test jig board as pictured above simulating the board of the installed end product, confirmed the compliance. The module and antenna will be trace designed according to antenna specification and OEM instructions submitted on the original application.
