Hi Lucy:

Please address following issues.

Q#1: The FCC ID listed doesn't comply with Part 2.925 and 2.926. Per Part 2.926, FCC ID can't exceed 17 Arabic numerals, including 3 Arabic numerals of grantee code. Please revise all related documents.

[Ans1# The new FCC ID: VQ2-USB2450-01-03, and the all related documents has been revised.](#)

Q#2: Per antenna specification, the antenna gain is 7dBi and per 15.247, if transmitting antennas of directional gain greater than 6 dBi are used, the conducted output power from the intentional radiator shall be reduced by the amount in dB that the directional gain of the antenna exceeds 6 dBi. Please revise the limit of RF output power listed in test report.

[Ans2# Revised the limit of RF output power, see page 15 of test report.](#)

Q#3: According to internal photos, an embedded PCB antenna is used, however, there are no technical documents has addressed this antenna. Please address.

[Ans3# The PCB antenna has been disabled.](#)
