Statement of GSM, W-CDMA, and LTE Function Disable

Product: Mobile phone
Model No.: F-01K
FCC ID: VQK-F01K

GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 5, 19, 21.

The above device has capabilities of GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 5, 19, 21. These functions cannot be activated by the user in case the Mobile phone is used or switched on in the United States. These functions can also not be activated by the user in case the Mobile phone is outside of the service area of a mobile phone network while switched on. In both cases, these functions are also not activated automatically.

When the Mobile phone is inside the service area of a mobile phone network, it will search all available mobile phone networks. These functions will not switch on automatically unless the Mobile phone detects networks having GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 5, 19, and 21 or if the Mobile phone detect network having W-CDMA Band V. Therefore these functions are never activated in the United States where there is no commercial network for those services on GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 19, and 21. While searching for the network the Mobile phone does not transmit any signal.

Also, the user access to all functions related to GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 5, 19, and 21 will be disabled where it cannot detect networks having those services, or where it can detect a network having W-CDMA Band V and this prevents the user from manually switching on these functions.

In case you have any question, please contact us,
