### **Statement of GSM, W-CDMA, and LTE Function Disable**

---

Product: Tablet PC  
Model No.: F-03G  
FCC ID: VQK-F03G

---

GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 19, 21.

The above device (Tablet PC) has capability of GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band 1, 3, 19, 21. These functions cannot be activated by the user in case the Tablet PC is used or switched on in the United States. These functions can also not be activated by the user in case the Tablet PC is outside of the service area of a Tablet PC network while switched on. In both cases, these functions are also not activated automatically.

When the Tablet PC is inside the service area of a mobile phone network, it will search all available cellular networks. These functions will not switch on automatically unless Tablet PC detects networks having GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band1, 3, 19, 21, or if the Tablet PC detect network having GSM850, PCS1900, W-CDMA Band V. Therefore these functions are never activated in the United States where there is no commercial network for those services. While searching for the network the Tablet PC does not transmit any signal.

Also, the user access to all functions related to GSM900, DCS1800, W-CDMA Band I, VI, XIX, LTE Band1, 3, 19, 21 will be disabled where it cannot detect networks having those services, or where it can detect network having GSM850, PCS1900, W-CDMA Band V and this prevents the user from manually switching on these functions.
