Declaration for Completely Uncorrelated Transmitter Outputs

To whom it may concern:

Amimon's baseband transmitter IC, part number **AMN2130**, uses Space Time Block Codes for which different digital data is carried by each transmit channel during any symbol period.

Therefore, per KDB 662911 D01 v02r01 (**Emissions Testing of Transmitters with Multiple Outputs in the Same Band**), these output signals are considered as ***completely uncorrelated***.

The FCC ID: **VQSAMNPTTX01** is a two antennae transmitter module uses only two channels of the IC **AMN2130** where the channels are ***completely uncorrelated*** with the same scheme.

Sincerely,
