Product Name: While GPS (Global

Positioning System)

FCC ID: VRBJSGB001

Model Number: JSG-B001

# **Electromagnetic Compatibility Test Report**

## For

Sage Co.Ltd. 2F, KY Bldg. 2-24 Sumiyoshi-Cho Naka-Ku Yokohama-City, 231-0013 Japan

REPORT NO: 14193911-E2V2 DATE: 2022/6/20 MODEL: JSG-B001

EUT: While GPS (Global Positioning System)

### Test Report Details

UL VERIFICATION SERVICES INC. Tests Performed By:

> **47173 BENICIA STREET** FREMONT, CA 94538, U.S.A.

Tests Performed For: Sage Co.Ltd.

2F, KY Bldg.

2-24 Sumiyoshi-Cho Naka-Ku Yokohama-City, 231-0013 Japan

Issue Date: 2022/6/20

Product Name: While GPS (Global Positioning System)

Model Number Tested: JSG-B001

Sample Serial Number: 21003759 and 21003760

FCC 47 CFR PART 15 SUBPART B Applicable Standards:

Date Test Item Received: March 22,2022

Testing Start Date: March 24,2022

March 24,2022 Date Testing Complete:

Compliant **Overall Results:** 

UL Verification Services Inc. tested the above equipment in accordance with the requirements set forth in the above standards. The test results show that the equipment tested is capable of demonstrating compliance with the requirements as documented in this report.

The results documented in this report apply only to the tested sample, under the conditions and modes of operation as described herein. It is the manufacturer's responsibility to assure that additional production units of this model are manufactured with identical electrical and mechanical components. All samples tested were in good operating condition throughout the entire test program. Measurement Uncertainties are published for informational purposes only and were not taken into account unless noted otherwise.

This document may not be altered or revised in any way unless done so by UL Verification Services Inc. and all revisions are duly noted in the revisions section. Any alteration of this document not carried out by UL Verification Services Inc. will constitute fraud and shall nullify the document. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, any agency of the Federal Government, or any agency of the U.S. government.

\*This report contains data that are not covered by the A2LA accreditation. The scope of accreditation is limited to the specific tests that are listed on the A2LA websites referenced at the end of this report.

REPORT NO: 14193911-E2V2

EUT: While GPS (Global Positioning System)

#### 1.0 TEST METHODOLOGY

The tests documented in this report were performed in accordance with ANSI C63.4:2014.

#### 1.1 Deviations from standard test methods

None

#### 1.2 Device Modifications Necessary for Compliance

None

#### 1.3 TEST RESULTS SUMMARY

This product is considered Class B

This report contains data provided by the customer which can impact the validity of results. UL Verification Services Inc. is only responsible for the validity of results after the integration of the data provided by the customer.

| Requirement – Test | Result (Compliant / Non-<br>Compliant) |
|--------------------|--|
| RADIATED EMISSIONS | Complies                               |

#### 2.0 DECISION RULES AND MEASUREMENT UNCERTAINTY

### 2.1 Metrological Traceability

All test and measuring equipment utilized to perform the tests documented in this report are calibrated on a regular basis, with a maximum time between calibrations of one year or the manufacturers' recommendation, whichever is less, and where applicable is traceable to recognized national standards

#### 2.2 Decision Rules

The Decision Rule is based on Simple Acceptance in accordance with ISO Guide 98-4: 2012 Clause 8.2. (Measurement uncertainty is not taken into account when stating conformity with a specified requirement).

#### 2.3 Measurement Uncertainty

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the apparatus:

| PARAMETER  | U <sub>lab</sub> | U <sub>Cispr</sub> |
|--|------------------|--------------------|
| Worst Case Conducted Disturbance, 9KHz to 0.15 MHz             | 3.39 db          | 3.8 db             |
| Worst Case Conducted Disturbance, 0.15 to 30 MHz               | 3.07 db          | 3.4 db             |
| Worst Case Conducted Disturbance Voltage Probe, 9KHz to 30 MHz | 2.8 db           | 2.9 db             |
| Worst Case Conducted Power, 30 MHz to 300MHz                   | 4.04 db          |                    |
| Worst Case Radiated Disturbance, 9KHz to 30 MHz (60cm Loop)    | 2.52 db          |                    |
| Worst Case Radiated Disturbance, 9KHz to 30 MHz (LLAS)         | 3.03             | 3.3                |
| Worst Case Radiated Disturbance, 30 to 1000 MHz                | 4.88 db          | 6.3 db             |
| Worst Case Radiated Disturbance, 1000 to 6000 MHz              | 4.24 db          | 5.2 db             |
| Worst Case Radiated Disturbance, 1000 to 18000 MHz             | 4.24 db          | 5.5                |
| Worst Case Radiated Disturbance, 18000 to 26000 MHz            | 4.37 db          |                    |
| Worst Case Radiated Disturbance, 26000 to 40000 MHz            | 5.17 db          |                    |

Uncertainty figures are valid to a confidence level of 95%.

#### 2.4 Sample Calculation

#### **RADIATED EMISSIONS**

Where relevant, the following sample calculation is provided:

Field Strength (dBuV/m) = Measured Voltage (dBuV) + Antenna Factor (dB/m) + Cable Loss (dB) - Preamp Gain (dB)

36.5 dBuV + 18.7 dB/m + 0.6 dB - 26.9 dB = 28.9 dBuV/m

#### MAINS CONDUCTED EMISSIONS

Where relevant, the following sample calculation is provided:

Final Voltage (dBuV) = Measured Voltage (dBuV) + Cable Loss (dB) + Limiter Factor (dB) + LISN Insertion Loss.

36.5 dBuV + 0 dB + 10.1 dB + 0 dB = 46.6 dBuV

#### 3.0 **GENERAL - Product Description**

#### 3.1 **Equipment Description**

BLE Tag is body worn device which connects and sends tag ID to TCU and BLE Sensor devices via Bluetooth. The product contains BLE module with FCC ID: RYYEYSHJN.

#### 3.2 **Device Configuration During Test**

The EUT was stand alone for Radiated Emissions testing.

#### 3.2.1 **Equipment Used During Test:**

| Use   | Product Type | Manufacturer | Model    | Comments |  |  |
|---|--------------|--------------|----------|----------|--|--|
| EUT BLE Tag Sa  |              | Sage Co.Ltd. | JSG-B001 | None     |  |  |
| Note: EUT - Equipment Under Test, AE - Auxiliary/Associated Equipment, or SIM - Simulator (Not Subjected to Test) |              |              |          |          |  |  |

#### 3.2.2 **Input/Output Ports:**

| Port #  | Name      | Type* | Cable<br>Max. >3m<br>(Y/N) | Cable<br>Shielded<br>(Y/N) | Comments |
|---|-----------|-------|----------------------------|----------------------------|----------|
| 0   | Enclosure | N/E   | _                          | _                          | None     |
| *Note:  AC = AC Power Port DC = DC Power Port N/E = Non-Electrical  I/O = Signal Input or Output Port (Not Involved in Process Control)  TP = Telecommunication Ports |           |       |                            |                            |          |

#### 3.2.3 EUT Highest Frequencies:

| Frequency (MHz) | Description                                    |
|-----------------|--|
| 2480 MHz        | Highest frequency generated or used by the EUT |

#### 3.2.4 Power Interface:

| Mode<br>#<br>/Rated | Voltage<br>(V) | Current<br>(A) | Power<br>(W) | Frequency<br>(DC/AC-Hz) | Phases<br>(#) | Comments       |
|---------------------|----------------|----------------|--------------|-------------------------|---------------|----------------|
| Rated               |                |                |              |                         | Single        |                |
|                     | 3 Vdc          | -              | -            | -                       | Single        | CR2032 Battery |

REPORT NO: 14193911-E2V2

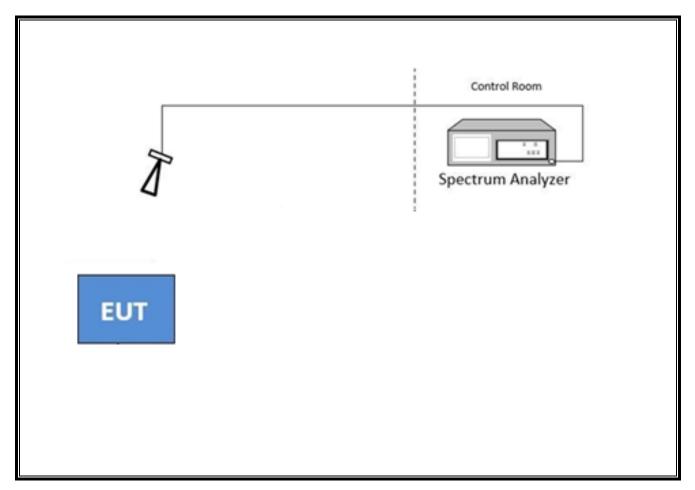

EUT: While GPS (Global Positioning System)

DATE: 2022/6/20

MODEL: JSG-B001

#### 3.3 Block Diagram:

The diagram below illustrates the configuration of the equipment above.

#### 3.4 Worst- Case Configuration and Mode

The fundamental of the EUT was investigated in three orthogonal orientations X, Y, & Z. It was determined that X orientation was worst-case orientation; therefore, all final radiated testing was performed with the EUT in X orientation.

EUT: While GPS (Global Positioning System) MODEL: JSG-B001

## 3.5 EUT Configurations

| Configuration # | Description                                 |  |
|-----------------|---|--|
| 1               | The EUT was powered by a Coin cell battery. |  |

### 3.6 EUT Operation Modes

| Mode of Operation# | Description                             |
|--------------------|---|
| 1                  | The EUT was powered on and stand alone. |

### 3.7 Rationale for EUT Configurations

| Configuration # | Description  |
|-----------------|--|
| 1               | The selected EUT configuration was chosen to maximize emissions. |

### 3.8 Rationale for EUT Mode of Operation

| Mode of Operation # | Description  |
|---------------------|--|
| 1                   | The mode of operations was determined by the manufacturer. |
