Dear Application Examiner:

We are submitting this application for the certification of our P700 WiFi (802.11b/g) radio module (JS part number 19782), FCC ID VSF19782MX. We are seeking limited modular approval under FCC 15.247 for use in our host, hand-held computer, the Allegro MX. Our BC04 Bluetooth radio module, FCC ID: VSF19799AR, will be collocated in the Allegro MX.

A Class II Permissive Change application is in process for FCC ID: VSF19799AR to permit collocation with FCC ID VSF19782MX in the Allegro MX.

The Allegro MX can be used in a body-worn configuration so a SAR Evaluation was performed. Simultaneous transmission of both radios during the SAR evaluation was not required per section 3(b)(ii)(1) of the FCC procedure "Mobile and Portable Device RF Exposure Procedures and Equipment Authorization Policies" (KDB 447498 D01 v03r02). Only the dominant radio, FCC ID: VSF19782MX was transmitting during the SAR evaluation.

The host device, the Allegro MX, is battery powered, but can still operate while charging.

The radio utilizes a single integral chip antenna. This configuration satisfies the requirements of 47 CFR 15.203.

The technical reports and exhibits demonstrate compliance with FCC rules 47 CFR 15.247 as a DTS transmitter.

Thank you for your work in reviewing this application.

Sincerely,

Juniper Systems, Inc.
