Overview

This application is for a class II permissive change to the model BC04 Bluetooth radio module which is used in the Juniper Systems, Inc. portable computer Model Allegro MX. This evaluation allows a new RF exposure conditions for the body-worn host device. The host device may also contain a WiFi radio model P700 FCC ID. VSF19782MX. The Allegro MX can be used in the body worn configuration and SAR data has been submitted in support of the device meeting RF exposure requirements.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
