Re: FCC ID: VSF25271

To Whom It May Concern:

The following application is submitted on behalf of our client, Juniper Systems, Inc., Inc., for evaluation of their model EM7355 for a class 2 permissive change.

The purpose of the permissive change is to address the integration of the EM7355 module (FCC ID: VSF25271) within the MS2GC rugged tablet (FCC ID: VSFMS2). There are no power or hardware changes on the module. The host device includes a Bluetooth 4.0/WLAN IEEE 802.11a/b/g/n transceiver.

The EUT was evaluated for RF exposure when integrated within the MS2GC host device. Additionally, the module was investigated for intermodulation products caused by co-transmission with the Bluetooth and WLAN transceivers.

The FCC ID: VSF25271 was found to be in compliance with the test requirements.

Sincerely,
