

## Identicom i770 – Label location

Main label detailing  
model number and basic  
user instruction.

Second label detailing  
unit serial number and  
modem IMEI number

### Statement re label location

Both of the labels highlighted above are clearly visible to the user. The insert of an ID card is temporary during product use with the design allowing for the easy and quick removal of the ID card at any time. ID cards are frequently removed as they are often swipe style entry cards and or reoved by the wearer at the end of a period of device usage.
