*National Technical Systems – Silicon Valley TCB
41039 Boyce Road
Fremont, CA. 94538*

To whom it may concern:

The enclosed documents constitute a formal submittal and application for a Change in ID to a previously FCC-certified device (and multiple listing for Industry Canada) pursuant to Parts 22 and 24 of the FCC's rules contained in CFR 47 and Industry Canada RSS-132 and RSS-133 for a Cellular Mobile GSM / modular approval PCS Mobile device

For Industry Canada certification, documentation showing the new label and attestation letters from the company with the existing verification and the company requesting the addition of their own model number to the existing listing have been provided. Please note that the RSP-100 report cover page information is taken from the original listing.

Note, the original device was approved using RSS-132, Issue 2 and RSS-133, Issue 5. The original test reports have been provided for your review, as we believe they show compliance to RSS-132, Issue 3 and RSS-133, Issue 6. We would like the REL to show the latest standards for the new approval.

National Technical Systems – Silicon Valley, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact National Technical Systems – Silicon Valley for assistance.

Sincerely,

Mark E. Hill
Staff Engineer
