Fremont, CA. 94538*

To whom it may concern:

The enclosed documents constitute a formal submittal and application for a Class II Permissive change / Reassessment for a Cellular Mobile GSM / PCS mobile device to add a portable use condition.

SAR testing was performed on the module in a specific host manufactured by the grant/certificate holder for the module. Refer to the user's manual for a description of the host device, model Identicom 977. The portable use condition would be limited to this host device.

Note, the product is granted under FCC equipment class codes of PCB and JBP. No changes were made to the JBP certification; therefore this Class II Permissive Change only applies to the PCB function.

National Technical Systems – Silicon Valley, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact National Technical Systems – Silicon Valley for assistance.

Sincerely,

Mark E. Hill  
Staff Engineer, NTS
