Wichtige Sicherheits-Hinweise

- 1. Bitte lesen Sie diese Hinweis sorgfältig durch.
- 2. Heben Sie diese Anleitung für den späteren Gebrauch auf.
- 3. Vor jedem Reinigen ist das Gerät vom Stromentz zu trennen. Verwenden Sie keine Flüssig-oder Aerosolreiniger. Am besten eignet sich ein angefeuchtetes Tuch zur Reinigung.
- 4. Die Netzanschluß-Steckdose soll nahe dem Gerät angebracht und leicht zugänglich sein.
- 5. Das Gerät ist vor Feuchtigkeit zu schützen.
- 6. Bei der Aufstellung des Gerätes ist auf sicheren Stand zu achten. Ein Kippen oder Fallen könnte Beschädigungen hervorrufen.
- 7. Beachten Sie beim Anschluß ans Stromnetz die Anschlußwerte.
- 8. Dieses Gerät kann bis zu einer Außentemperatur von maximal 40℃ betrieben werden.

Battery safety warning:

DO NOT throw the battery in fire.

DO NOT short circuit the contacts.

DO NOT disassemble the battery.

DO NOT throw the battery in municipal waste.

The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

CAUTION

Risk of explosion if battery is replaced by an incorrect type.

Dispose of used batteries according to the instructions.

"ORSICHT"

Explosionsgetahr bei unsachgemen Austausch der Batterie. Ersatz nur durch denselben oder einem vom Hersteller empfohlenem nlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

Class B:

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/ TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Federal Communication Commission (FCC) Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. This equipment should be installed and operated contact with the radiator & your body.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines when used with the belt clip accessory provided by TSC. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

High Power Radars: High power radars are allocated as primary users (meaning they have priority) in the 5250MHz to 5350MHz and 5650MHz to 5850MHz bands. These radars could cause interference and/or damage to Wireless LAN devices used in Canada.

Les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu'ils ont la priorité) pour les bandes 5250 - 5350 MHz et 5650 - 5850 MHz. Ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

IC Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in IC RSS-102 and had been tested in accordance with the measurement methods and procedures specified in IEEE 1528.

电池安全警告:

- ◎ 勿将电池扔于火中。
- ◎ 勿将电池接点短路。
- ◎ 不可拆解电池。
- ◎ 不乱将电池当成一般废弃物处理。
- ◎ 打叉的垃圾桶符号表示电池不应该被放置到一般废弃堆中。

注意:

- ◎ 更换不正确型号类型的电池,将产生爆炸危险。
- ◎ 请根据使用说明处理用过的电池。

1. Introduction

1.1 Product Introduction

Thank you very much for purchasing TSC bar code printer.

Enjoy TSC's reputation for cost-efficient, high durability printers with the Alpha-4L economical receipt printer. The Alpha-4L is a comfortable, light-weight printer capable of working with any mobile receipt printing application where you need quick, simple receipts on demand. Our Alpha-4L is designed for a rough life, inside the IP54-rated environmental case to resist dust and water and with its rubber over-mold design prepared to take up to a five foot fall and keep printing. These small and light printers can be worn comfortably for a full shift, without interfering with the user's tasks. Use USB, optional Wireless or serial to connect to a mobile computer or even a smart phone and produce clear easy-to-read receipts hour after hour.

This document provides an easy reference for operating the Alpha-4L.

To print label formats, please refer to the instructions provided with your labeling software; if you need to write the custom programs, please refer to the TSPL/TSPL2 programming manual that can be found on the accessories CD-ROM or on TSC website at http://www.tscprinters.com.

Applications

- Portable point of sale
- Retail item marking, markdowns, shelf labeling & shelf talkers
- Labels for shipping & receiving
- Inventory control
- Cross-docking
- Pick, pack & apply operations
- Print pick tickets
- Logistics receipts

1.2 Product Features

1.2.1 Printer Standard Features

The printer offers the following standard features.

Ī	P	ro	d	uc	4	ef	2	nc	la	rd	l fe	ai	hii	ro
		ıv	u	uu		ЭI	.aı	ш	a	I U	16	Г	ւս	

Direct thermal printing

Black mark reflective sensor

(center position, black mark in back side)

Gap transmissive sensor (Fixed, center of offset 2.75 mm to right from center)

Head open sensor

Peeler sensor

2 operation buttons (On/off and feed)

3 LEDs for printer status, 3 LEDs for battery status

USB 2.0 (full speed) interface

32 MB SDRAM memory

16 MB FLASH memory

Micro SD card reader for memory expansion up to SDHC 4G (max.)

DC 7.2V/5800 mAh Li-ion rechargeable battery

Real time clock

Powerful 32 bit 200 MHz RISC processor

Eltron® EPL and Zebra® ZPL emulation languages support

Internal 8 alpha-numeric bitmap fonts

Internal Monotype Imaging[®] true type font engine with one CG Triumvirate Bold Condensed scalable font

Fonts and bar codes can be printed in any one of the four directions (0, 90,180, 270 degree)

Downloadable fonts from PC to printer memory

Downloadable firmware upgrades

Bar code, graphics/image printing

Supported bar code		Supported image
1D bar code	2D bar code	BITMAP, BMP, PCX
Code128 subsets A.B.C, Code128UCC, EAN128, Interleave 2 of 5, Code 39, Code 93, EAN-13, EAN-8, Codabar, POSTNET, UPC-A, UPC-E, EAN and UPC 2(5) digits, MSI, PLESSEY, China Post, ITF14, EAN14, Code 11, TELPEN, PLANET, Code 49, Deutsche Post Identcode, Deutsche Post Leitcode, LOGMARS	CODABLOCK F mode, DataMatrix, Maxicode, PDF-417, Aztec, MicroPDF417, QR code, RSS Barcode (GS1 Databar)	(Max. 256 colors graphics)

1.3 General Specifications

General Specifications				
Physical dimensions	160 mm (W) x 191.6 mm (H) x 79 mm (D)			
Mechanism	Plastic with rubber over molded			
Weight	0.945 kg (w/o battery)			
Power	External power adapter Input: AC 100-240V Output: DC 12V 1A			
Environmental condition	Operation: -10 ~ 50°C (14 ~ 122°F) Storage: -40 ~ 60 °C (-40 ~ 140°F) Relative humidity: 10 ~ 90% non-condensing IP54 w/ IP54-rated environmental case Drop 1.5m (5ft) Drop 1.8m (6.5ft) w/ IP54-rated environmental case			
Battery Spec	Charging time: 5~6 hr Standby mode (Wi-Fi): up to 40 hr Printing: one label per 2 minutes, Condition Endurance (hr) 4"x6" Labels Density 3 26 780 Density 8 21 650			
Charging capability	Internal charging capability (battery-in) Auto-switching AC adapter 12-24VDC automobile cigarette lighter plug External charging capability (battery-out) 1 battery charger station 4 battery charger station			

1.4 Print Specifications

Print Specifications				
Print head resolution (dots per inch/mm)	203 dots/inch (8 dots/mm)			
Printing method	Direct thermal			
Dot size (width x length)	0.125 x 0.125 mm (1 mm = 8 dots)			
Print speed (inches per second)	Max. 4 ips (100 mm/sec) 2,3 ips for peeler mode			
Max. print width	4.09" (104 mm)			
Max. print length	90" (2286 mm)			
Printout bias	Vertical: 1 mm max. Horizontal: 1 mm max.			

1.5 Media Specifications

Media Specifications				
Media roll capacity	Max. 2.65" (67.3 mm) OD			
Media core diameter	12.7 mm ~ 25.4 mm (0.5" ~ 1") ID core			
Media type	Continuous, die-cut, black mark, External fan- fold, receipt, Linerless label (w/ linerless kit)			
Media wound type	Outside wound			
Media width	50.8 mm ~ 112 mm			
Media thickness	0.055 mm ~ 0.165 mm			
Label length	12.7 mm ~ 2286 mm			
Label length (peeler mode)	25.4 ~ 152.4 mm (1" ~ 6")			
External fan-fold media	Stack height: 70 mm (2.75") Page length: 152 mm ~ 305 mm (6" ~ 12")			
Black mark	Min. 8 mm (W) x 2 mm (H)			
Gap height	Min. 2 mm			

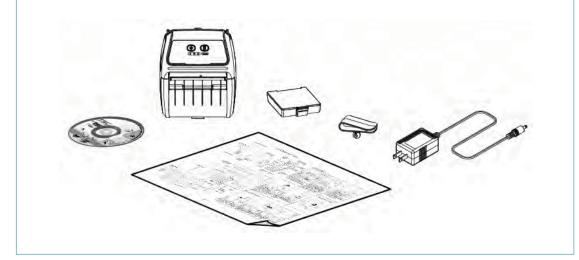

2. Operations Overview

2.1 Unpacking and Inspection

This printer has been specially packaged to withstand damage during shipping. Please carefully inspect the packaging and printer upon receiving the bar code printer. Please retain the packaging materials in case you need to reship the printer.

Unpacking the printer, the following items are included in the carton.

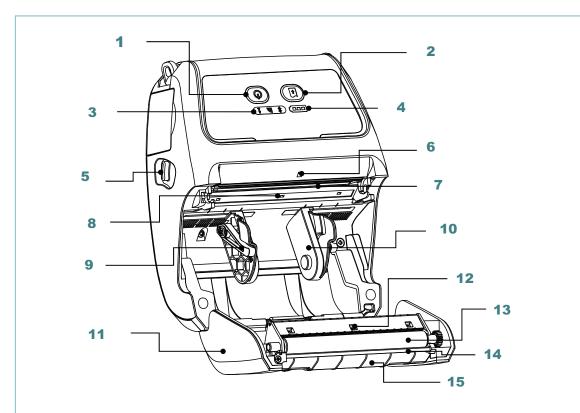

- One printer unit
- One Li-ion rechargeable battery (5800 mAh)
- One Windows labeling software/Windows driver CD disk
- One quick installation guide
- One auto-switching AC adaptor
- One belt clip

If any parts are missing, please contact the Customer Service Department of your purchased reseller or distributor.

2.2 Printer Overview

2.2.1 Front View

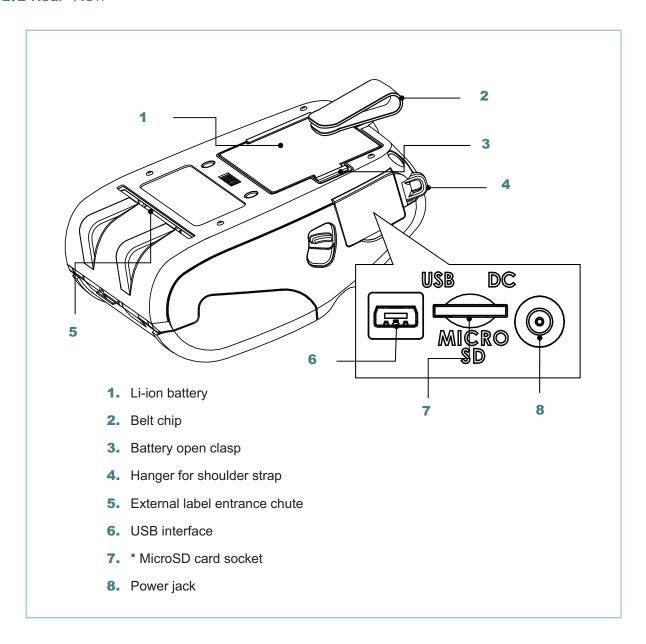

- 1. Power on/off button
- 2. Feed button
- 3. Printer status LED indicator
- 4. Battery status LED indicator
- 5. Media cover release button
- 6. Peel-off sensor (Without for linerless model)
- 7. Print head
- 8. Transmissive sensor Gap sensor
- 9. Media holder lock switch
- 10. Media holder
- 11. Media cover
- 12. Reflective sensor Black mark sensor
- **13.** Platen roller
- 14. Tear/Peeler bar (Without for linerless model)
- 15. Peeler module

Note:

- * The media sensor position is selectable by factory adjustment. Please refer to this figure for default settings. (Default center position)
- * For LCD control panel (option), please refer to subsection 2.3.2 for more details.

2.2.2 Rear View

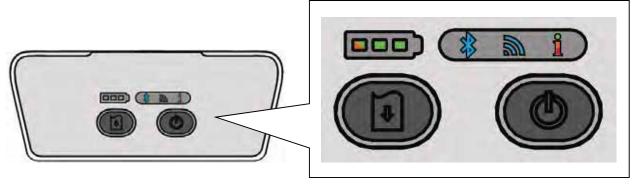

Note:

* Recommended MicroSD card specification.

SD card spec	SD card capacity	Approved SD card manufacturer		
V1.0, V1.1	MicroSD 128 MB	Transcend, Panasonic		
V1.0, V1.1	MicroSD 256 MB	Transcend, Panasonic		
V1.0, V1.1	MicroSD 512 MB	Transcend, Panasonic		
V1.0, V1.1	MicroSD 1 GB	Transcend, Panasonic		
V2.0 SDHC CLASS 6 MicroSD 4 GB Transcend				
The DOS FAT file system is supported for the SD card.Folders/files stored in the SD card should be in the 8.3 filename format				

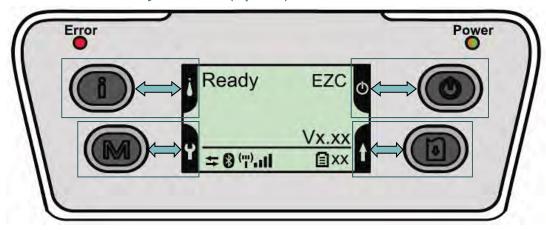

2.3 Operator Control

2.3.1 LED Indication and Keys

	Battery capacity %		

Note: Please refer to the $\underline{\text{section 6}}$ for more details about LCD.

3. Setup

3.1 Install the Belt Clip and Battery

1. Insert the belt clip first.

Insert the left side to install the battery at the rear of the printer.

3. Push the right side of the battery.

Battery safety warning:

DO NOT throw the battery in fire. DO NOT short circuit the contacts.

DO NOT disassemble the battery. DO NOT throw the battery in municipal waste.

The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

3.2 Charge the Battery

It takes 5~6 hours to fully charge the battery before the first time usage. The lifetime of the battery is 300 times for charge/discharge cycles.

3.2.1 Charge the Battery

1. The battery is installed into the printer.

2. Open the interface cover and plug the power cord to the power jack.

Plug the power cord into a properly power outlet.

Note:

Please switch OFF printer power prior to plug in the power cord to printer power jack.

When the battery is charging, please do not remove the battery from the printer, otherwise, please re-plug the power cord into a power outlet.

Standard panel:

LCD panel: (option)

4. When the battery is changing, the color of battery status LED indicator is solid amber.

Note

The battery is completely charged and the amber of LED indicator will turn to green.

3.3 Loading the Media

3.3.1 Loading the Media

 Open the printer media cover by pressing the media cover release button.

Pull the media holders apart to fit the label roll width.

3. Place the roll between the media holders and close them onto the core. Place the paper, printing side face up, and pull out enough paper over the print head.

4. Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

- * Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.
- * Please refer to video on <u>TSC</u> <u>YouTube</u> or driver CD.

3.3.2 Loading Media in Peel-off Mode

Please refer to <u>subsection</u>
 3.3.1 to loading the media roll into the printer.

Note:

Please calibrate the gap/black mark sensor after loading media in peel-off mode. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.

2. Remove 1~2 labels from the liner.

 Press each side of media cover to close the media cover and make sure the media cover closed correctly.

4. Feed the liner go through the peeler module. (as figure shown)

5. Pull the liner tightly.

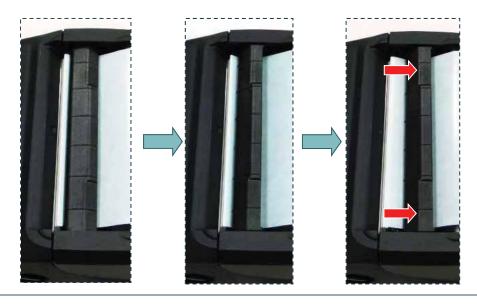

6. Move the peeler module to near the peeler bar by pushing each side of peeler module. (cover the platen roller)

7. Press down the peeler module to lock it.

Loose the peeler module in the reverse procedures:

3.3.3 Loading the Fan-fold/External Media

 Open the printer media cover by pressing the media cover release button. Pull the media holders apart to fit the media width.

2. Push down each side of media holder lock switch to fix the media holder.

3. Feed the media through the rear external label entrance chute. Place the paper, printing side face up.

 Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.

3.3.4 Loading the Linerless Media (Option)

- 1. Please refer to <u>subsection 3.3.1</u> to loading the media roll into the printer.
- 2. Push down each side of media holder lock switch to fix the media holder for using linerless media.

3. Place the paper, printing side face up, and pull out enough paper over the print head.

 Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

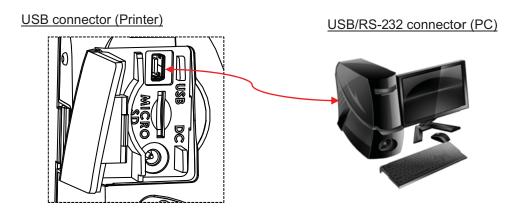

Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.

3.4 Connecting the Printer

The printer must establish communication with a host terminal which sends the data to be printed. There are three ways to connect for Alpha-4L series,

- * By a cable between the printer and its host terminal
- * By a Wireless LAN (Option)

3.4.1 Cable Communications

Open the interface cover and connect the printer to the computer/smart phone (host terminal) with USB cable. (USB to USB or USB to RS-232)

3.4.2 Wireless Communications with Wi-Fi (Option)

You should set the WLAN settings via the cable for first using. Please refer to section 5.4 to setting the Wi-Fi module. If your printer supports the LCD, please refer the section 6.3.4 to set the WLAN settings.

3.5 Install the IP54-rated Environmental Case with Shoulder Strap (Option)

Open the case top cover.

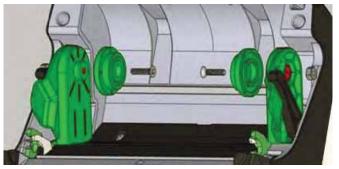

2. Put the printer into the case.

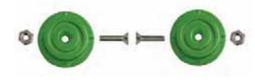

3. Close the case top cover. The outside cover should be opened while printing.

3.6 Install the Adapter for 0.75" and 1" Paper Core (Option)

- 1. Check the parts.
 - · Adapter x 2
 - Screw x 2
 - Nut x 2

2. Put the nut on the media holder.

3. Make the arrow direction is as fig. to install the adapter.

4. Pull the media holders apart.
Push down another side of media holder lock switch to keep the media holder in max width.

5. Tighten the screw on nut for fixing the adapter on media holder.

Note: Press the nut with hand when tighten the screw.

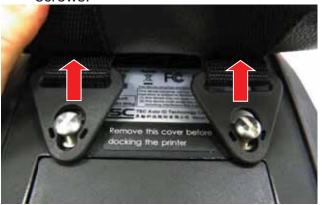

3.7 Install the Belt Strap (Option/ Standard for linerless model)

1. Tighten 2 screws on the printer.

2. Pull up the belt strap to lock it on the screws.

3. Open the belt strap for using.

- 27 -	
-,	

4. Power-on Utilities

There are three power-on utilities to set up and test printer hardware. These utilities are activated by pressing FEED button (1) then turning on the printer power (1) simultaneously and release the button at different positions of LED indicator.

4.1 Power-on Utility for Standard Panel

Please follow the steps below for different power-on utilities.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button ($^{\textcircled{1}}$) then turn on the power switch ($^{\textcircled{1}}$).
- 3. Release the power switch (0) when $\mathring{1}$ LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the button () when battery LED indicates with different positions for each function.

Power on utilities for standard panel	The battery LED light will be changed as following.				
LED	(5 blinks)	(5 blinks)	(5 blinks)		
Release FEED button () for different functions	Media sensor calibration (Please refer to 4.1.1)	Media sensor calibration, self-test and enter dump mode (Please refer to 4.1.2)	Printer initialization (Please refer to 4.1.3)		

4.1.1 Media Sensor Calibration

	F	lease	follow	the	steps	below	to	calibrate	the	media	senso	r
--	---	-------	--------	-----	-------	-------	----	-----------	-----	-------	-------	---

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button () then turn on the power switch ().
- 3. Release the power switch (0) when $\mathring{1}$ LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button (1) when the indicator becomes and blinking.
- 5. Printer will calibrate the gap/black mark sensor sensitivity.

Note: You also can do this function by open/close the media cover when turn on the printer.

■ The LEDs will be changed as following figures: Beep sound twice \rightarrow □□□ (5 blinks) \rightarrow □□□ (5 blinks) \rightarrow Turn on the printer

4.1.2 Self-test and Dump Mode

Please follow the steps below.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button (1) then turn on the power switch (1).
- 3. Release the power switch (1) when $\mathring{1}$ LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button () when the indicator becomes and blinking.
- 5. Printer will calibrate the sensor and print out the internal settings, then enter the dump mode.

Note: Turn off/on the power or press FEED button to resume printer from dump mode to normal printing mode. Please refer to sections 4.3 and 4.4 for more details of self-test and dump mode.

■ The LEDs will be changed as following figures:
Beep sound twice → □□□ (5 blinks) → □□□ (5 blinks) → Turn on the printer

4.1.3 Printer Initialization

Printer initialization is used to clear DRAM and restore printer settings to defaults.

Printer initialization is activated by the following procedures.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button () then turn on the power switch ().
- 3. Release the power switch (0) when $\mathring{1}$ LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button () when the indicator becomes and blinking.
- 5. Printer will restore printer settings to defaults.

Note: Please refer to section 4.5 for printer defaults.

■ The LEDs will be changed as following figures:

Beep sound twice → □□□ (5 blinks) → □□□ (5 blinks) → Turn on the printer

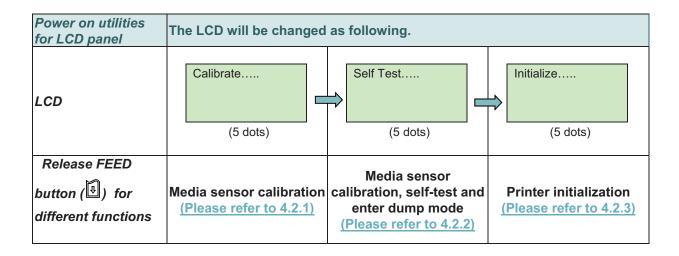

4.2 Power-on Utility for LCD Panel (Option)

Please follow the steps below for different power-on utilities.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button ($^{\textcircled{1}}$) then turn on the power switch ($^{\textcircled{1}}$).
- 3. Release the power switch ((b)) when "Error" LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the button () when LCD indicate for different functions.

4.2.1 Media Sensor Calibration

Please follow the steps below to calibrate the media sensor.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button ($^{\textcircled{1}}$) then turn on the power switch ($^{\textcircled{1}}$).
- 3. Release the power switch (b) when "Error" LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button () when LCD showing "Calibrate.....".
- 5. Printer will calibrate the gap/black mark sensor sensitivity.

Note: You also can do this function by open/close the media cover when turn on the printer.

■ The LCD will be changed as following:
Beep sound twice → Calibrate..... (5 dots) → Self Test..... (5 dots) → Initialize..... (5 dots) → Turn on the printer

4.2.2 Self-test and Dump Mode

Please follow the steps below.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button (1) then turn on the power switch (1).
- 3. Release the power switch (0) when "Error" LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button () when LCD showing "Self Test.....".
- 5. Printer will calibrate the sensor and print out the internal settings, then enter the dump mode.

Note: Turn off/on the power or press FEED button to resume printer for normal printing. (Ready mode) Please refer to <u>sections 4.3</u> and <u>4.4</u> for more details.

■ The LCD will be changed as following figures:

Beep sound twice → Calibrate..... (5 dots) → Self Test..... (5 dots) → Initialize..... (5 dots) → Turn on the printer

4.2.3 Printer Initialization

Printer initialization is used to clear DRAM and restore printer settings to defaults.

Printer initialization is activated by the following procedures.

- 1. Turn off the printer power switch.
- 2. Hold on the FEED button () then turn on the power switch ().
- 3. Release the power switch ((b)) when "Error" LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

- 4. The printer will beep sound twice later, then release the FEED button () when the LCD showing "Initialize.....".
- 5. Printer will restore printer settings to defaults.

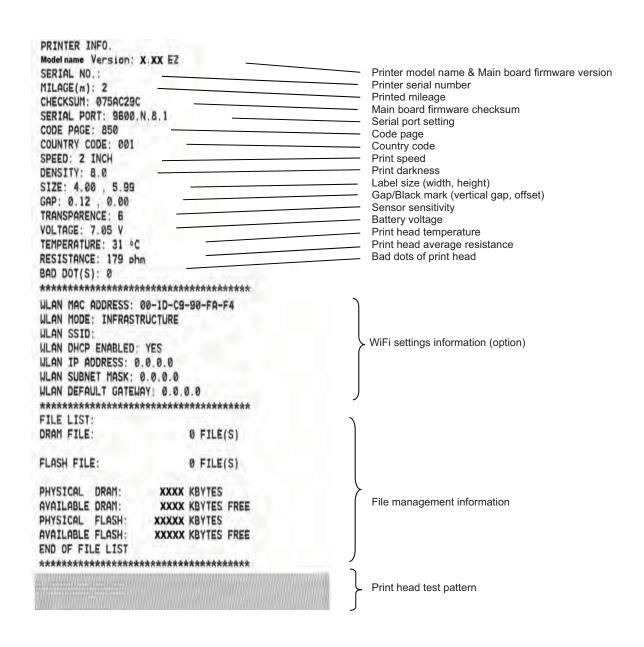

Note: Please refer to <u>section 4.5</u> for printer defaults.

■ The LCD will be changed as following figures:
Beep sound twice → Calibrate..... (5 dots) → Self Test..... (5 dots) → Initialize..... (5 dots) → Turn on the printer

4.3 Self-test

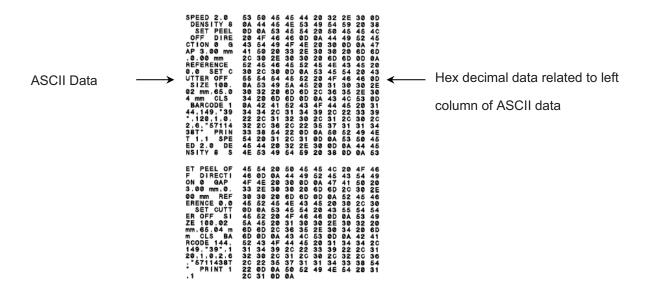

Printer will print the printer configuration after media sensor calibration. Self-test printout can be used to check if there is any dot damage on the heater element, printer configurations and available memory space.

Note: Self-test printout requires 4" wide paper width.

4.4 Dump mode

Printer will enter dump mode after printing printer configuration. In the dump mode, all characters will be printed in 2 columns as following. The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

Note:

- 1. Dump mode requires 4" wide paper width.
- 2. Turn off / on the power or press FEED button to resume printer for normal printing. (Ready mode)

4.5 Printer defaults

Printer configuration will be restored to defaults as below after initialization.

Parameter	Default setting
Speed	50.8 mm/sec (2 ips)
Density	8
Media Width	4" (101.5 mm)
Media Height	4" (101.5 mm)
Sensor Type	Gap sensor
Print Direction	0
Reference Point	0,0 (upper left corner)
Gap Offset	0
Post-Print Action	Tear mode
Serial Port Settings	9600 bps, none parity, 8 data bits, 1 stop bit
Code Page	850
Country Code	001
Clear Flash Memory	No

Note:

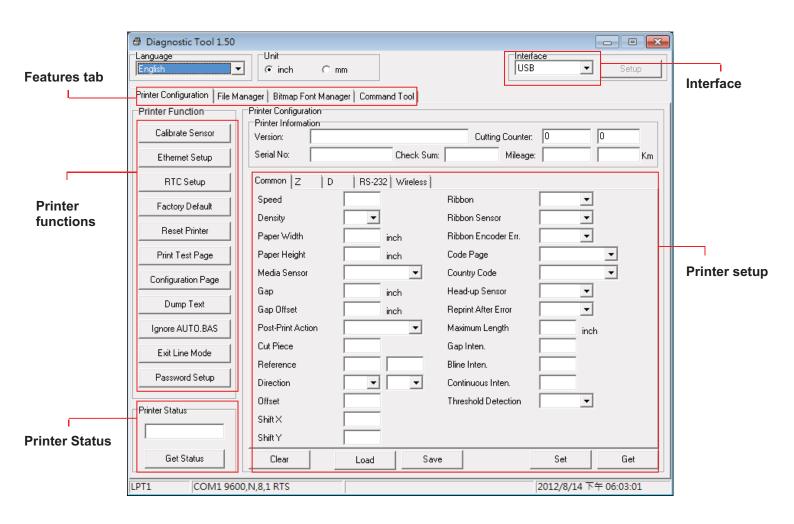

When printer initialization is done, please calibrate the gap or black mark sensor before printing.

5. Diagnostic Tool

TSC's Diagnostic Utility is an integrated tool incorporating features that enable you to explore a printer's settings/status; change a printer's settings; download graphics, fonts and firmware; create a printer bitmap font; and send additional commands to a printer. With the aid of this powerful tool, you can review printer status and setting in an instant, which makes it much easier to troubleshoot problems and other issues.

5.1 Start the Diagnostic Tool

- 1. Double click on the Diagnostic tool icon DiagToolexe to start the software.
- 2. There are four features (Printer Configuration, File Manager, Bitmap Font Manager, Command Tool) included in the Diagnostic utility.

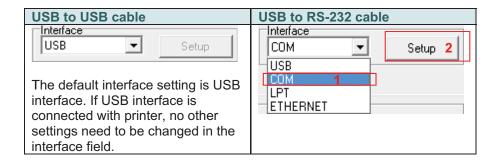

5.2 Printer Function

1. Connect the printer and computer with a cable.

Note:

- * The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).
- 2. Select the PC interface connected with bar code printer.

- 3. Click the "Printer Function" button to setup.
- 4. The detail functions in the Printer Function Group are listed as below.

Printer Function	Function	Description
Calibrate Sensor	Calibrate Sensor	Calibrate the sensor specified in the Printer Setup group media sensor field
Ethernet Setup	Ethernet Setup	Setup the IP address, subnet mask, gateway for the on board Ethernet
RTC Selup	RTC Setup	Synchronize printer Real Time Clock with PC
Factory Default	Factory Default	Initialize the printer and restore the settings to factory default.
Reset Printer	Reset Printer	Reboot printer
Print Test Page	Print Test Page	Print a test page
Configuration Page	Configuration Page	Print printer configuration
Dump Text	Dump Text	To activate the printer dump mode.
Ignore AUT0.BAS	Ignore AUTO.BAS	Ignore the downloaded AUTO.BAS program
Exit Line Mode	Exit Line Mode	Exit line mode.
Password Setup	Password Setup	Set the password to protect the settings

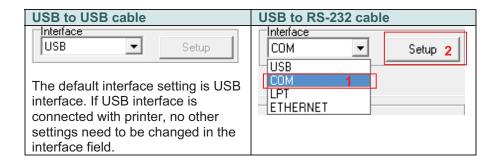

For more information about Diagnostic Tool, please refer to the diagnostic utility quick start guide in the CD disk \ Utilities directory.

5.4 Setting Wi-Fi by Diagnostic Tool (Option)

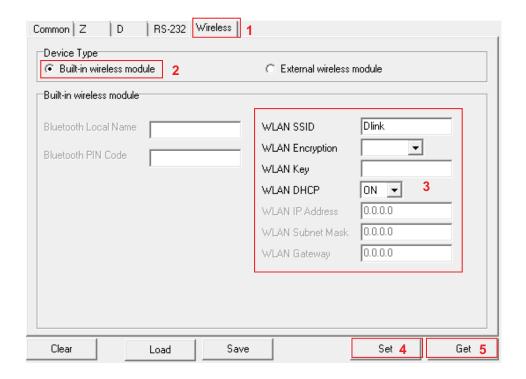

1. Connect the printer and computer with the cable.

Note:

- * The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).
- 2. Turn on the printer power switch.
- 3. Open Diagnostic tool and set interface. (The default setting is USB.)

- 4. Select "Wireless" tab and click on "Built-in wireless module" item.
- 5. Enter the new WLAN settings in the editor.
- 6. Press "Set" button to set the new settings to the printer.
- 7. The Wi-Fi LED will turn on blue (the Wi-Fi icon will be shown for LCD panel) if device has been connected.
- 8. Print out the self-test page to confirm if it's connected with right settings.
- 9. Remove the cable to print a data for test.

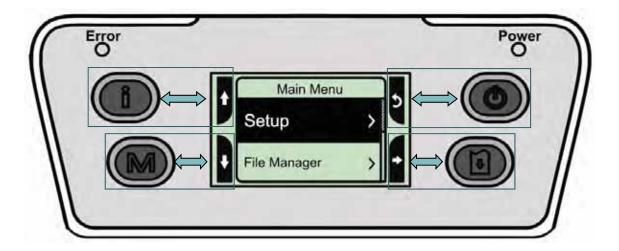

6. LCD Menu Function (Option)

The Alpha-4L series offer the LCD panel for selection to further enhance its capabilities to meet the demands of a wide range of printing solutions. This option feature includes LCD control panel, 4 buttons and 2 LED display. Please press the "M" button to enter the setting menu.

6.1 How to use the LCD to set the printer

Press the "M" button to display the function menu screen as following shown.

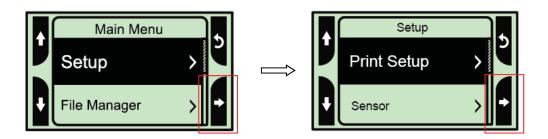

You can use this 4 buttons to scroll, select, enter or return the menu, depend on the icons from 4-sides of LCD. It was selected if the item with the black ground on the screen. The icon function is listed as below,

Icon	Function
Å	Display printer information
Y	Enter setting menu
Ф	Power switch
†	Scroll up
•	Scroll down
5	Return to previous menu
→	Enter to next menu
±	Enter setting mode
±	Exit setting mode
Н	Save the selected settings and return to previous menu
✓	Select
0	Alter to OFF
0	Alter to ON

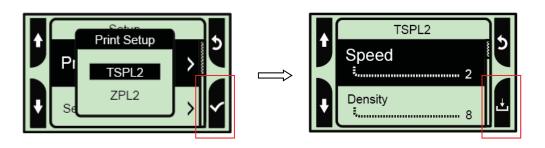

For example:

Change the speed setting, please following steps as below.

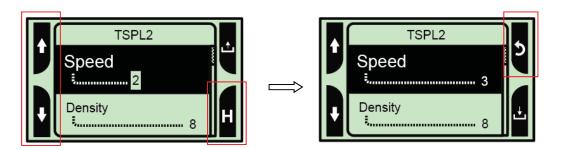

1. Press "M" button to enter the setting menu. Press 🗓 button to enter the "Setup" item.

2. Press button to enter the "Print Setup" item. Select the "TSPL2" item. Enter the "Speed" setting mode.

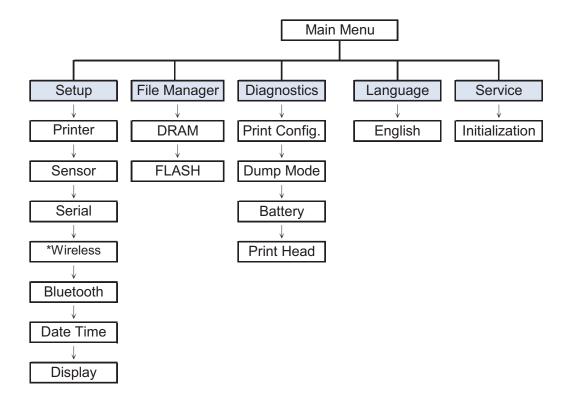

3. At this status, you can scroll up or scroll down to select the value of print speed. Then press the button to save the selected value into the printer. Press "b" butter to back to "Ready mode".

6.2 Main Menu Overview

There are 5 categories for the main menu. You can easy to set the settings of printer without connecting the computer. Please refer to following sections for more details.

Note:

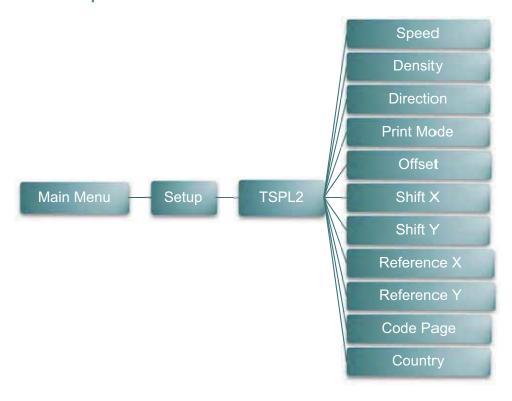

^{*} The Wireless LAN function is optional for Alpha-4L series.

6.3 Setup

This "Setup" category can set up the sensor, serial comm., wireless, date time and display settings.

6.3.1 Printer Setup

6.3.1-1 Printer setup for TSPL2

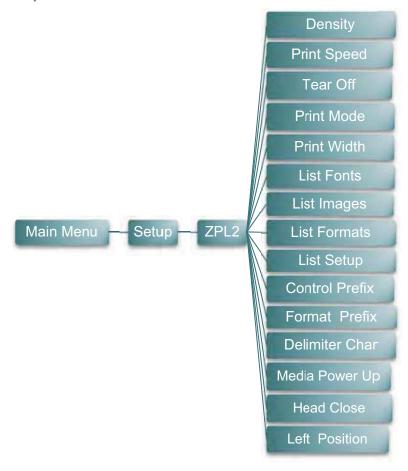

Item	Description	Default
Speed	Use this item to setup print speed. The each increase or decrease is 0.5 ips. Available setting is from 1 to 6.	2
Density	Use this option to setup printing darkness. The available setting is from 0 to 15, and the step is 1. You may need to adjust your density based on selected media.	8
	The direction setting value is either 1 or 0. Use this item to setup the printout direction. DIRECTION 0 DIRECTION 1	
Direction	Direction	0

	This item is used to set the print mode. There are 3 modes as below,				
	Printer Mode	Description			
Print mode	None	Next label top of form is aligned to the print head burn line location. (Tear Off Mode)		Batch Mode	
	Batch Mode	Once image is printed completely, label gap/black mark will be fed to the tear plate location for tear away.		Wiode	
	Peeler Mode	Enable the label peel off mode.			
Offset	This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9".			+000	
Shift X	This item is used to fine tune print position. Available setting value is			+000	
Shift Y	from "+" to "-" or "0" to "9".			+000	
Reference X	This item is used to set the origin of printer coordinate system horizontally			000	
Reference Y	and vertically. Available setting value is from "0" to "9".			000	
Code page	Use this item to set the code page of international character set.			850	
Country	Use this option t	o set the country code.	Use this option to set the country code.		

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

6.3.1-2 Printer setup for ZPL2

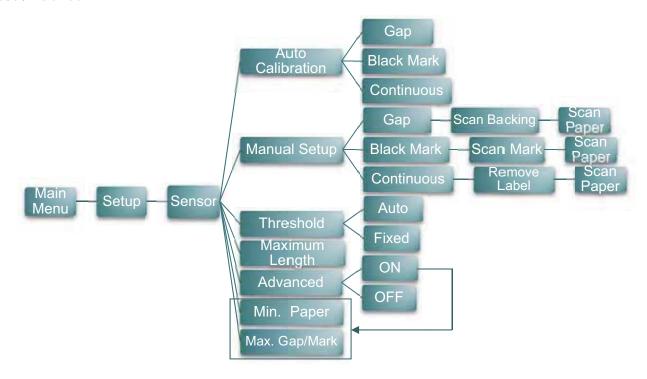

Item	Description	Default
Density	Use this item to setup printing darkness. The available setting is from 0 to 30, and the step is 1. You may need to adjust your density based on selected media.	16
Print Speed	Use this item to setup print speed. The each increase or decrease is 1 ips. Available setting is from 1 to 6.	2
Tear Off	This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9".	+000
Print mode	This item is used to set the print mode. There are 2 modes as below, Printer Mode Description Tear Off Next label top of form is aligned to the print Mode Mode head burn line location. Peeler Mode Enable the label peel off mode.	Tear Off
Print Width	This item is used to set print width. The available value is from "0" to "9".	812

List Fonts		used to print current printer available fonts list to fonts stored in the printer's DRAM, Flash or bry card.	N/A	
List Images	the label. The	This feature is used to print current printer available images list to the label. The images stored in the printer's DRAM, Flash or optional memory card.		
List Formats	the label. The optional memo		N/A	
List Setup	This feature is label.	used to print current printer configuration to the	N/A	
Control Prefix	This feature is	used to set control prefix character.	N/A	
Format Prefix	This feature is	used to set format prefix character.	N/A	
Delimiter Char	This feature is	used to set delimiter character.	N/A	
Media Power Up	This option is to on the printer. Selections Feed Calibration Length No Motion	Description Printer will advance one label Printer will calibration the sensor levels, determine length and feed label Printer determine length and feed label Printer will not move media	No Motion	
Head Close	This option is the print head. Selections Feed Calibration Length No Motion	Description Printer will advance one label Printer will calibration the sensor levels, determine length and feed label Printer determine length and feed label Printer will not move media	No Motion	
Label Top	This option is used to adjust print position vertically on the label. The range is -120 to +120 dots.			
Left Position	This option is u	used to adjust print position horizontally on the ge is -9999 to +9999 dots.	+0000	

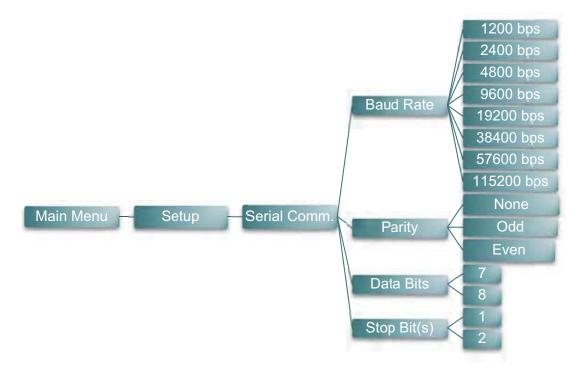

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

6.3.2 Sensor

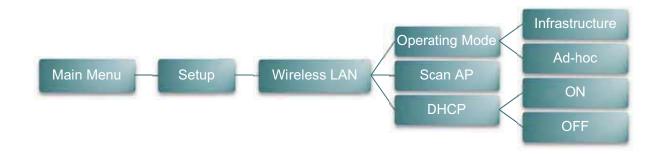

Item	Description	Default
Auto Calibration	This item is used to set the media sensor type and calibrate the selected sensor. Printer will feed 2 to 3 gap labels to calibrate the sensor sensitivity automatically.	N/A
Manual Setup	In case "Auto Calibration" cannot apply to the media, please use "Manual Setup" function to calibrate the sensor manually. Please follow the shown step from LCD to do. Note: You can open the media cover to move the paper but have to close the media cover for each scan.	N/A
Threshold	This item is used to fix the calibrated sensor sensitivity.	Auto
Maximum Length	This item is used to set the max. calibrate length.	152
Advanced	This item is used for pre-printed paper. If this advanced function is turned "ON" then you can setup the min. paper and max. gap/black mark size.	OFF

6.3.3 Serial Comm.

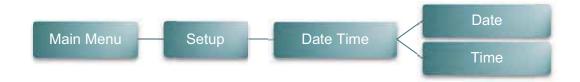

Item	Description	Default
Baud Rate	This item is used to set the RS-232 baud rate.	9600
Parity	This item is used to set the RS-232 parity.	None
Data Bits	This item is used to set the RS-232 Data Bits.	8
Stop Bit(s)	This item is used to set the RS-232 Stop Bits.	1

6.3.4 Wireless LAN

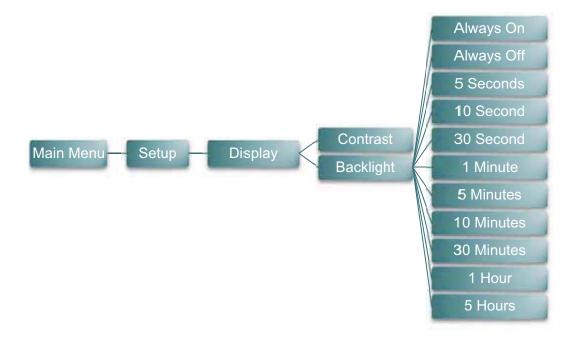

Item	Description	Default
Operating Mode	This item is used to set the operating mode of wireless local area networks to connect devices to the networks. Note: Infrastructure mode requires the use of an access point for this communication to take place. Ad hoc mode involves connecting a computer	Infrastructure
	directly to another computer.	
Scan AP	This item is used to scan the access point devise	N/A
DHCP	This item is used to ON or OFF the DHCP (Dynamic Host Configuration Protocol) network protocol.	

6.3.5 Date Time

Item	Description	Default
Date	This item is used to set the date. (ex: 2013-05-30)	N/A
Time	This item is used to set the time. (ex: 19:20:02)	N/A

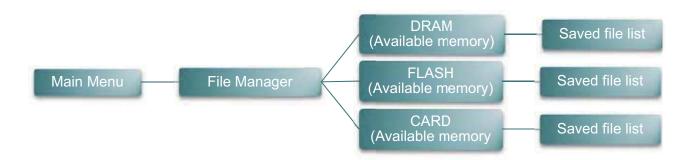

6.3.7 Display

Item	Description	Default
Contrast	This item is used to set the contrast for display.	50
Backlight	This item is used to set the backlight time for display.	10 Seconds

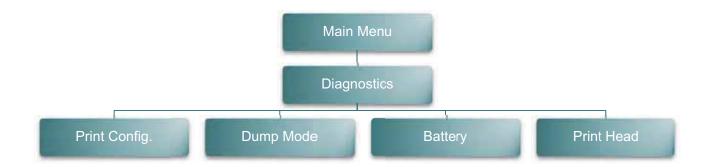

6.4 File Manager

This feature is used to check the printer available memory and file list.

Item	Description
DRAM	Use this menu to show available memory space and run (.BAS) the files saved in the printer DRAM memory.
FLASH	Use this menu to show available memory space and run (.BAS) the files saved in the printer Flash memory.
CARD	Use this menu to show available memory space and run (.BAS) the files saved in the printer MicroSD card memory.

6.5 Diagnostics

6.5.1 Print Config.

This feature is used to print current printer configuration to the label. On the configuration printout, there is a print head test pattern, which is useful for checking if there is any dot damage on the print head heater element. Please refer to <u>section 4.3</u> for more details.

6.5.2 Dump Mode

Captures the data from the communications port and prints out the data received by printer. In the dump mode, all characters will be printed in 2 columns. (Please refer to section 4.4) The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

Note:

Dump mode requires 4" wide paper width.

6.5.3 Battery

This feature is used to check the printer battery voltage.

6.5.4 Print Head

This feature is used to check the printer temperature, resistance, and bad dots for print head.

6.6 Language

This option is used to setup the language on LCD display.

6.7 Service

This feature is used to restore printer settings to defaults. Please refer to section 4.5.

Note:

When printer initialization is done, please calibrate the gap or black mark sensor before printing.

7. Troubleshooting

The following guide lists the most common problems that may be encountered when operating this bar code printer. If the printer still does not function after all suggested solutions have been invoked, please contact the Customer Service Department of your purchased reseller or distributor for assistance.

Problem	Possible Cause	Recovery Procedure
Power indicator does not illuminate	* The battery is not properly installed. * Battery out of power. * The battery is dead.	* Reinstall the battery. * Switch the printer on. * Charge the battery. * Replace a new battery.
Not Printing	* Check if interface cable is well connected to the interface connector. * Check if wireless device is well connected between host and printer. * The port specified in the Windows driver is not correct.	* Re-connect cable to interface. * Please reset the wireless device setting. * Select the correct printer port in the driver.
No print on the label	* Label loaded not correctly. * Use wrong type paper	* Follow the instructions in loading the media. * Use thermal type paper
The printer status from DiagTool or LCD shows "Head Open".	* The printer carriage is open.	* Please close the print carriage.
The printer status from DiagTool or LCD shows "Out of Paper"	* Running out of media roll. * The media is installed incorrectly. * Media sensor is not calibrated.	* Supply a new media roll. * Follow the instructions in loading the media to reinstall the media roll. * Calibrate the media sensor.
The printer status from DiagTool or LCD shows "Paper Jam".	* Media sensor is not set properly. * Make sure media size is set properly. * Label may be stuck inside the printer mechanism.	* Calibrate the media sensor. * Set media size correctly. * Remove the stuck label inside the printer mechanism.
The printer status from LCD shows "Strong light. Press FEED to print."	* Peel-off sensor can't work in strong light place.	* Remove the printer to proper place to print for peer-off mode.
Can't downloading the file to memory (FLASH / DRAM/CARD)	* The space of memory is full.	* Delete unused files in the memory. * The max. numbers of DRAM is 256 files. * The max. user addressable memory space of DRAM is 2048KB. * The max. numbers of file of FLASH is 256 files. * The max. user addressable memory space of FLASH is 14336KB.

Poor Print Quality	* Media is loaded incorrectly * Dust or adhesive accumulation on the print head. * Print density is not set properly. * Print speed is not set properly. * Print head element is damaged.	* Reload the supply. * Clean the print head. * Clean the platen roller. * Adjust the print density and print speed. * Run printer self-test and check the print head test pattern if there is dot missing in the pattern. * Change proper media roll.
Missing printing on the left or right side of label	* Wrong label size setup.	* Set the correct label size.
Gray line on the blank label	* The print head is dirty. * The platen roller is dirty.	* Clean the print head. * Clean the platen roller. Please refer to section 8
Irregular printing	* The printer is in Hex Dump mode.	* Turn off and on the printer to skip the dump mode.

8. Maintenance

This session presents the clean tools and methods to maintain your printer.

- 1. Please use one of following material to clean the printer.
 - Cotton swab
 - Lint-free cloth
 - Vacuum / Blower brush
 - 100% Ethanol or Isopropyl Alcohol
- 2. The cleaning process is described as following,

Printer Part	Method	Interval	
	 Always turn off the printer before cleaning the print head. Allow the print head to cool for a minimum of one minute. Use a cotton swab and 100% Ethanol or Isopropyl Alcohol to clean the print head surface. 	Clean the print head when changing a new label roll.	
		Print Head	
Print Head	Print Head Element Head Cleaner Pen	Element	
Platen Roller	Turn the power off. Rotate the platen roller and wipe it thoroughly with water.	Clean the platen roller when changing a new label roll	
Peel Bar	Use the lint-free cloth with 100% ethanol to wipe it.	As needed	
Sensor	Compressed air or vacuum	Monthly	
Exterior	Wipe it with water-dampened cloth	As needed	
Interior	Brush or vacuum	As needed	

Note:

- Do not touch printer head by hand. If you touch it careless, please use ethanol to clean it.
- Please use 100% Ethenol or Isopropyl Alcohol. DO NOT use medical alcohol, which may damage the printer head.
- Regularly clean the print head and supply sensors once change a new media to keep printer performance and extend printer life.
